antibodies

## Datasheet for ABIN3083827 CHCHD3 Protein (AA 2-227) (His tag)

## Overview

| Quantity:                     | 1 mg   |
|-------------------------------|--|
| Target:                       | CHCHD3   |
| Protein Characteristics:      | AA 2-227   |
| Origin:                       | Human  |
| Source:                       | Insect Cells   |
| Protein Type:                 | Recombinant  |
| Purification tag / Conjugate: | This CHCHD3 protein is labelled with His tag.                        |
| Application:                  | SDS-PAGE (SDS), ELISA, Western Blotting (WB), Crystallization (Crys) |
|                               |  |

## Product Details

| Sequence:        | GGTTSTRRVT FEADENENIT VVKGIRLSEN VIDRMKESSP SGSKSQRYSG AYGASVSDEE<br>LKRRVAEELA LEQAKKESED QKRLKQAKEL DRERAAANEQ LTRAILRERI CSEEERAKAK<br>HLARQLEEKD RVLKKQDAFY KEQLARLEER SSEFYRVTTE QYQKAAEEVE AKFKRYESHP   |
|------------------|---|
|                  | VCADLQAKIL QCYRENTHQT LKCSALATQY MHCVNHAKQS MLEKGG<br>Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a special request, please contact us.  |
| Characteristics: | <ul> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> <li>Human CHCHD3 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade.</li> <li>State-of-the-art algorithm used for plasmid design (Gene synthesis).</li> </ul> |
|                  | This protein is a made to order protein and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein.   |

|                   | The big advantage of ordering our made-to-order proteins in comparison to ordering custom   |
|-------------------|---|
|                   | made proteins from other companies is that there is no financial obligation in case the protein   |
|                   | cannot be expressed or purified.  |
|                   | In the unlikely event that the protein cannot be expressed or purified we do not charge anything  |
|                   | (other companies might charge you for any performed steps in the expression process for   |
|                   | custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression  |
|                   | experiments or purification optimization).  |
|                   | When you order this made-to-order protein you will only pay upon receival of the correctly  |
|                   | folded protein. With no financial risk on your end you can rest assured that our experienced  |
|                   | protein experts will do everything to make sure that you receive the protein you ordered.   |
|                   | The concentration of our recombinant proteins is measured using the absorbance at 280nm.  |
|                   | The protein's absorbance will be measured in several dilutions and is measured against its  |
|                   | specific reference buffer.  |
|                   | The concentration of the protein is calculated using its specific absorption coefficient. We use  |
|                   | the Expasy's protparam tool to determine the absorption coefficient of each protein.  |
| Purification:     | Two step purification of proteins expressed in baculovirus infected SF9 insect cells:   |
|                   | 1. In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate |
|                   | fractions are analyzed by SDS-PAGE.<br>2. Protein containing fractions of the best purification are subjected to second purification step   |
|                   | through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.  |
| Purity:           | >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.  |
| Sterility:        | 0.22 µm filtered  |
| Endotoxin Level:  | Protein is endotoxin free.  |
| Grade:            | Crystallography grade   |
| Target Details    |   |
| Target:           | CHCHD3  |
| Alternative Name: | CHCHD3 (CHCHD3 Products)  |
| Rackaround        | Component of the MICOS complex, a large protein complex of the mitachandrial inner  |
| Background:       | Component of the MICOS complex, a large protein complex of the mitochondrial inner  |

membrane that plays crucial roles in the maintenance of crista junctions, inner membrane

architecture, and formation of contact sites to the outer membrane. Has also been shown to

|                     | function as a transcription factor which binds to the BAG1 promoter and represses BAG1            |
|---------------------|---|
|                     |   |
|                     | transcription. Plays an important role in the maintenance of the MICOS complex stability and      |
|                     | the mitochondrial cristae morphology (PubMed:25781180). {ECO:0000269 PubMed:22567091,             |
|                     | ECO:0000269 PubMed:25781180}.   |
| Molecular Weight:   | 27.0 kDa Including tag.   |
| UniProt:            | Q9NX63  |
| Application Details |   |
| Application Notes:  | In addition to the applications listed above we expect the protein to work for functional studies |
|                     | as well. As the protein has not been tested for functional studies yet we cannot offer a          |
|                     | guarantee though.   |
| Comment:            | In cases in which it is highly likely that the recombinant protein with the default tag will be   |
|                     | insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to     |
|                     | increase solubility. We will discuss all possible options with you in detail to assure that you   |
|                     | receive your protein of interest.   |
| Restrictions:       | For Research Use only   |
| Handling            |   |
| Format:             | Liquid  |
| Buffer:             | 100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.        |
| Handling Advice:    | Avoid repeated freeze-thaw cycles.  |
| Storage:            | -80 °C  |
| Storage Comment:    | Store at -80°C.   |
| Expiry Date:        | Unlimited (if stored properly)  |
