Characteristics:	Made in Germany - from design to production - by highly experienced protein experts.	
	 Human PLP1 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade. 	
	 State-of-the-art algorithm used for plasmid design (Gene synthesis). 	
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.	
	The protein's absorbance will be measured in several dilutions and is measured against its	
	specific reference buffer.	
	The concentration of the protein is calculated using its specific absorption coefficient. We use	
	the Expasy's protparam tool to determine the absorption coefficient of each protein.

Purification:	The protein is purified from the cleared cell lysate using Rho1D4 capture materials. Eluate	
	fractions are analyzed by SDS-PAGE. Protein containing fractions are subjected to a second	
	purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS	
	PAGE and Western blot.	
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.	
Sterility:	0.22 µm filtered	
Endotoxin Level:	Protein is endotoxin-free.	
Grade:	Crystallography grade	
Target Details		
Target:	PLP1	
Alternative Name:	PLP1 (PLP1 Products)	
Background:	This is the major myelin protein from the central nervous system. It plays an important role in	
	the formation or maintenance of the multilamellar structure of myelin.	
Molecular Weight:	30.6 kDa	
UniProt:	P60201	
Application Details		
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies	
	as well. As the protein has not been tested for functional studies yet we cannot offer a	
	guarantee though.	
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be	
	insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to	
	increase solubility. We will discuss all possible options with you in detail to assure that you	
	receive your protein of interest.	
Restrictions:	For Research Use only
