## Datasheet for ABIN3084447 NAP1L4 Protein (AA 2-375) (His tag)

Image

## Overview

Quantity:	1 mg
Target:	NAP1L4
Protein Characteristics:	AA 2-375
Origin:	Human
Source:	Escherichia coli (E. coli)
Protein Type:	Recombinant
Purification tag / Conjugate:	This NAP1L4 protein is labelled with His tag.
Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS), Crystallization (Crys)

## Product Details

Sequence:	ADHSFSDGVP SDSVEAAKNA SNTEKLTDQV MQNPRVLAAL QERLDNVPHT PSSYIETLPK

	EGEDEDDAEI NPKV
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	Made in Germany - from design to production - by highly experienced protein experts.
	Human NAP1L4 Protein (raised in E. Coli) purified by multi-step, protein-specific process to
	ensure crystallization grade.

This protein is a made to order protein and will be made for the first time for your order. Ou experts in the lab will ensure that you receive a correctly folded protein. The big advantage of ordering our made-to-order proteins in comparison to ordering custo	n
The big advantage of ordering our made-to-order proteins in comparison to ordering custo	
	ein
made proteins from other companies is that there is no financial obligation in case the pro	
cannot be expressed or purified.	
In the unlikely event that the protein cannot be expressed or purified we do not charge any	ning
(other companies might charge you for any performed steps in the expression process for	
custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression	n
experiments or purification optimization).	
When you order this made-to-order protein you will only pay upon receival of the correctly	
folded protein. With no financial risk on your end you can rest assured that our experienced	
protein experts will do everything to make sure that you receive the protein you ordered.	
The concentration of our recombinant proteins is measured using the absorbance at 280n	n.
The protein's absorbance will be measured in several dilutions and is measured against its	
specific reference buffer.	
The concentration of the protein is calculated using its specific absorption coefficient. We	ise
the Expasy's protparam tool to determine the absorption coefficient of each protein.	
Purification: Two step purification of proteins expressed in bacterial culture:	
1. In a first purification step, the protein is purified from the cleared cell lysate using three	
different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE.	
2. Protein containing fractions of the best purification are subjected to second purification	step
through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and	
Western blot.	
Purity: >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.	
Sterility: 0.22 µm filtered	
Endotoxin Level: Endotoxin has not been removed. Please contact us if you require endotoxin removal.	
Grade: Crystallography grade

Target Details		
Molecular Weight:	43.6 kDa Including tag.	
UniProt:	Q99733	
Application Details		
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.	
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.	
Restrictions:	For Research Use only	
Handling		
Format:	Liquid	
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.	
Handling Advice:	Avoid repeated freeze-thaw cycles.	
Storage:	-80 °C	
Storage Comment:	Store at -80°C.	
Expiry Date:	Unlimited (if stored properly)
