antibodies

# Datasheet for ABIN3086022 PEX10 Protein (AA 1-326) (Strep Tag)

Overview

| Quantity:                     | 1 mg   |
|-------------------------------|--|
| Target:                       | PEX10  |
| Protein Characteristics:      | AA 1-326                                       |
| Origin:                       | Human  |
| Source:                       | Tobacco (Nicotiana tabacum)                    |
| Protein Type:                 | Recombinant                                    |
| Purification tag / Conjugate: | This PEX10 protein is labelled with Strep Tag. |
| Application:                  | ELISA, Western Blotting (WB), SDS-PAGE (SDS)   |

### Product Details

| Sequence:        | MAPAAASPPE VIRAAQKDEY YRGGLRSAAG GALHSLAGAR KWLEWRKEVE LLSDVAYFGL                            |
|------------------|--|
|                  | TTLAGYQTLG EEYVSIIQVD PSRIHVPSSL RRGVLVTLHA VLPYLLDKAL LPLEQELQAD                            |
|                  | PDSGRPLQGS LGPGGRGCSG ARRWMRHHTA TLTEQQRRAL LRAVFVLRQG LACLQRLHVA                            |
|                  | WFYIHGVFYH LAKRLTGITY LRVRSLPGED LRARVSYRLL GVISLLHLVL SMGLQLYGFR                            |
|                  | QRQRARKEWR LHRGLSHRRA SLEERAVSRN PLCTLCLEER RHPTATPCGH LFCWECITAW                            |
|                  | CSSKAECPLC REKFPPQKLI YLRHYR   |
|                  | Sequence without tag. The proposed Strep-Tag is based on experience s with the expression    |
|                  | system, a different complexity of the protein could make another tag necessary. In case you  |
|                  | have a special request, please contact us.   |
| Characteristics: | Key Benefits:  |
|                  | • Made in Germany - from design to production - by highly experienced protein experts.       |
|                  | Protein expressed with ALiCE® and purified by multi-step, protein-specific process to ensure |

All rights reserved. correct folding and modification.

- These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein. The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

#### Expression System:

- ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require post-translational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
  protein production are removed, leaving only the protein production machinery and the
  mitochondria to drive the reaction. During our lysate completion steps, the additional
  components needed for protein production (amino acids, cofactors, etc.) are added to
  produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

#### Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer.
- We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.

| Purification: | Two step purification of proteins expressed in Almost Living Cell-Free Expression System  |
|---------------|---|
|               | (ALICE®):   |
|               | <ol> <li>In a first purification step, the protein is purified from the cleared cell lysate using StrepTag<br/>capture material. Eluate fractions are analyzed by SDS-PAGE.</li> </ol>                      |
|               | 2. Protein containing fractions of the best purification are subjected to second purification step<br>through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and<br>Western blot. |
| Purity:       | >80 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.  |

### Product Details

Endotoxin Level:

Low Endotoxin less than 1 EU/mg (< 0.1 ng/mg)

## Target Details

| Target:             | PEX10   |
|---------------------|---|
| Alternative Name:   | PEX10 (PEX10 Products)  |
| Background:         | Peroxisome biogenesis factor 10 (EC 2.3.2.27) (Peroxin-10) (Peroxisomal biogenesis factor 10)     |
|                     | (Peroxisome assembly protein 10) (RING finger protein 69),FUNCTION: E3 ubiquitin-protein          |
|                     | ligase component of a retrotranslocation channel required for peroxisome organization by          |
|                     | mediating export of the PEX5 receptor from peroxisomes to the cytosol, thereby promoting          |
|                     | PEX5 recycling (PubMed:24662292). The retrotranslocation channel is composed of PEX2,             |
|                     | PEX10 and PEX12, each subunit contributing transmembrane segments that coassemble into            |
|                     | an open channel that specifically allows the passage of PEX5 through the peroxisomal              |
|                     | membrane (By similarity). PEX10 also regulates PEX5 recycling by acting as a E3 ubiquitin-        |
|                     | protein ligase (PubMed:24662292). When PEX5 recycling is compromised, PEX10 catalyzes             |
|                     | polyubiquitination of PEX5 during its passage through the retrotranslocation channel, leading to  |
|                     | its degradation (By similarity). {ECO:0000250 UniProtKB:Q05568,                                   |
|                     | ECO:0000269 PubMed:24662292}.   |
| Molecular Weight:   | 37.1 kDa  |
| UniProt:            | 060683  |
| Pathways:           | Monocarboxylic Acid Catabolic Process   |
| Application Details |   |
| Application Notes:  | In addition to the applications listed above we expect the protein to work for functional studies |
|                     | as well. As the protein has not been tested for functional studies yet we cannot offer a          |
|                     | guarantee though.   |
