

## Datasheet for ABIN3086373 CDC40 Protein (AA 1-579) (Strep Tag)

Overview

Quantity:	250 µg
Target:	CDC40
Protein Characteristics:	AA 1-579
Origin:	Human
Source:	Cell-free protein synthesis (CFPS)
Protein Type:	Recombinant
Purification tag / Conjugate:	This CDC40 protein is labelled with Strep Tag.
Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS)

Characteristics:	Key Benefits:	
	<ul> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> <li>Protein expressed with ALICE® and purified in one-step affinity chromatography</li> <li>These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).</li> <li>State-of-the-art algorithm used for plasmid design (Gene synthesis).</li> </ul>	
	This protein is a <b>made-to-order protein</b> and will be made for the first time for your order. Our	
	experts in the lab try to ensure that you receive soluble protein.	
	The big advantage of ordering our <b>made-to-order proteins</b> in comparison to ordering custom	
	made proteins from other companies is that there is no financial obligation in case the protein	
	cannot be expressed or purified.	
	Expression System:	
	<ul> <li>ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require post-translational modifications.</li> <li>During lysate production, the cell wall and other cellular components that are not required fo protein production are removed, leaving only the protein production machinery and the mitochondria to drive the reaction. During our lysate completion steps, the additional components needed for protein production (amino acids, cofactors, etc.) are added to produce something that functions like a cell, but without the constraints of a living system - all that's needed is the DNA that codes for the desired protein!</li> </ul>	
	Concentration:	
	<ul> <li>The concentration of our recombinant proteins is measured using the absorbance at 280nm</li> <li>The protein's absorbance will be measured against its specific reference buffer.</li> <li>We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.</li> </ul>	
Purification:	One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®).

## Target Details

Target:	CDC40	
Alternative Name:	CDC40 (CDC40 Products)	
Background:	<ul> <li>Pre-mRNA-processing factor 17 (Cell division cycle 40 homolog) (EH-binding protein 3) (Ehb3)</li> <li>(PRP17 homolog) (hPRP17),FUNCTION: Required for pre-mRNA splicing as component of the activated spliceosome (PubMed:33220177). Plays an important role in embryonic brain development, this function does not require proline isomerization (PubMed:33220177).</li> <li>{ECO:0000269 PubMed:28076346, ECO:0000269 PubMed:28502770,</li> <li>ECO:0000269 PubMed:29301961, ECO:0000269 PubMed:29360106,</li> <li>ECO:0000269 PubMed:29361316, ECO:0000269 PubMed:30705154,</li> <li>ECO:0000269 PubMed:33220177, ECO:0000269 PubMed:9830021}.</li> </ul>	
Molecular Weight:	65.5 kDa	
UniProt:	O60508	
Pathways:	Ribonucleoprotein Complex Subunit Organization	
Application Details		
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.
