antibodies

Datasheet for ABIN3086440 PPARD Protein (AA 1-441) (Strep Tag)

Overview

Quantity:	1 mg
Target:	PPARD
Protein Characteristics:	AA 1-441
Origin:	Human
Source:	Tobacco (Nicotiana tabacum)
Protein Type:	Recombinant
Purification tag / Conjugate:	This PPARD protein is labelled with Strep Tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS), ELISA

Product Details

Sequence:	MEQPQEEAPE VREEEEKEEV AEAEGAPELN GGPQHALPSS SYTDLSRSSS PPSLLDQLQM
	GCDGASCGSL NMECRVCGDK ASGFHYGVHA CEGCKGFFRR TIRMKLEYEK CERSCKIQKK
	NRNKCQYCRF QKCLALGMSH NAIRFGRMPE AEKRKLVAGL TANEGSQYNP QVADLKAFSK
	HIYNAYLKNF NMTKKKARSI LTGKASHTAP FVIHDIETLW QAEKGLVWKQ LVNGLPPYKE
	ISVHVFYRCQ CTTVETVREL TEFAKSIPSF SSLFLNDQVT LLKYGVHEAI FAMLASIVNK
	DGLLVANGSG FVTREFLRSL RKPFSDIIEP KFEFAVKFNA LELDDSDLAL FIAAIILCGD
	RPGLMNVPRV EAIQDTILRA LEFHLQANHP DAQYLFPKLL QKMADLRQLV TEHAQMMQRI
	KKTETETSLH PLLQEIYKDM Y
	Sequence without tag. The proposed Strep-Tag is based on experience s with the expression
	system, a different complexity of the protein could make another tag necessary. In case you
	have a special request, please contact us.
Characteristics:	Key Benefits:

- · Made in Germany from design to production by highly experienced protein experts.
- Protein expressed with ALICE® and purified by multi-step, protein-specific process to ensure correct folding and modification.
- These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein.

The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Expression System:

- ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require posttranslational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
 protein production are removed, leaving only the protein production machinery and the
 mitochondria to drive the reaction. During our lysate completion steps, the additional
 components needed for protein production (amino acids, cofactors, etc.) are added to
 produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer.
- We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.

Purification:

Two step purification of proteins expressed in Almost Living Cell-Free Expression System (ALiCE®):

- 1. In a first purification step, the protein is purified from the cleared cell lysate using StrepTag capture material. Eluate fractions are analyzed by SDS-PAGE.
- Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.

Product Details

Purity:	>80 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Endotoxin Level:	Low Endotoxin less than 1 EU/mg (< 0.1 ng/mg)

Target Details

0	
Target:	PPARD
Alternative Name:	PPARD (PPARD Products)
Background:	Peroxisome proliferator-activated receptor delta (PPAR-delta) (NUCI) (Nuclear hormone
	receptor 1) (NUC1) (Nuclear receptor subfamily 1 group C member 2) (Peroxisome proliferator
	activated receptor beta) (PPAR-beta),FUNCTION: Ligand-activated transcription factor key
	mediator of energy metabolism in adipose tissues (PubMed:35675826). Receptor that binds
	peroxisome proliferators such as hypolipidemic drugs and fatty acids. Has a preference for
	poly-unsaturated fatty acids, such as gamma-linoleic acid and eicosapentanoic acid. Once
	activated by a ligand, the receptor binds to promoter elements of target genes. Regulates the
	peroxisomal beta-oxidation pathway of fatty acids. Functions as transcription activator for the
	acyl-CoA oxidase gene. Decreases expression of NPC1L1 once activated by a ligand.
	{ECO:0000269 PubMed:1333051, ECO:0000269 PubMed:15604518,
	ECO:0000269 PubMed:35675826}.
Molecular Weight:	49.9 kDa
UniProt:	Q03181
Pathways:	Nuclear Receptor Transcription Pathway, Positive Regulation of Peptide Hormone Secretion,
	Steroid Hormone Mediated Signaling Pathway, Monocarboxylic Acid Catabolic Process,
	Smooth Muscle Cell Migration, Positive Regulation of fat Cell Differentiation

Application Details

Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.

Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer. If you have a special request, please contact us.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
