

# Datasheet for ABIN3086619 PTPN1 Protein (AA 1-435) (Strep Tag)

Overview

| Quantity:                     | 250 µg   |
|-------------------------------|--|
| Target:                       | PTPN1  |
| Protein Characteristics:      | AA 1-435                                       |
| Origin:                       | Human  |
| Source:                       | Cell-free protein synthesis (CFPS)             |
| Protein Type:                 | Recombinant                                    |
| Purification tag / Conjugate: | This PTPN1 protein is labelled with Strep Tag. |
| Application:                  | Western Blotting (WB), SDS-PAGE (SDS), ELISA   |

# Product Details

| Brand:    | AliCE®  |

# Product Details

### Characteristics:

#### Key Benefits:

- Made in Germany from design to production by highly experienced protein experts.
- Protein expressed with ALiCE® and purified in one-step affinity chromatography
- These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

### Expression System:

- ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require posttranslational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
  protein production are removed, leaving only the protein production machinery and the
  mitochondria to drive the reaction. During our lysate completion steps, the additional
  components needed for protein production (amino acids, cofactors, etc.) are added to
  produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

### Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured against its specific reference buffer.
- We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.

| Purification: | One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®). |
|---------------|--|
| Purity:       | > 70-80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC).                                 |
| Grade:        | custom-made  |

# Target Details

| Target:             | PTPN1  |
|---------------------|--|
| Alternative Name:   | PTPN1 (PTPN1 Products)   |
| Background:         | Tyrosine-protein phosphatase non-receptor type 1 (EC 3.1.3.48) (Protein-tyrosine phosphatase<br>1B) (PTP-1B),FUNCTION: Tyrosine-protein phosphatase which acts as a regulator of<br>endoplasmic reticulum unfolded protein response. Mediates dephosphorylation of<br>EIF2AK3/PERK, inactivating the protein kinase activity of EIF2AK3/PERK. May play an<br>important role in CKII- and p60c-src-induced signal transduction cascades. May regulate the<br>EFNA5-EPHA3 signaling pathway which modulates cell reorganization and cell-cell repulsion.<br>May also regulate the hepatocyte growth factor receptor signaling pathway through<br>dephosphorylation of MET. {ECO:0000269 PubMed:18819921,<br>ECO:0000269 PubMed:21135139, ECO:0000269 PubMed:22169477}.   |
| Molecular Weight:   | 50.0 kDa   |
| UniProt:            | P18031   |
| Pathways:           | TLR Signaling, Response to Growth Hormone Stimulus, ER-Nucleus Signaling, Platelet-derived growth Factor Receptor Signaling  |
| Application Details |  |
| Application Notes:  | In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.   |
|                     |  |

### Handling

| Format:          | Liquid   |
|------------------|--|
| Buffer:          | The buffer composition is at the discretion of the manufacturer.<br>Standard Storage Buffer: PBS pH 7.4, 10 % Glycerol <b>Might differ depending on protein.</b> |
| Handling Advice: | Avoid repeated freeze-thaw cycles.   |
| Storage:         | -80 °C   |
| Storage Comment: | Store at -80°C.  |
| Expiry Date:     | 12 months  |
