

## Datasheet for ABIN3086851 RASA2 Protein (AA 2-850) (His tag)

Overview

Quantity:	1 mg
Target:	RASA2
Protein Characteristics:	AA 2-850
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This RASA2 protein is labelled with His tag.
Application:	Crystallization (Crys), ELISA, SDS-PAGE (SDS), Western Blotting (WB)

## Product Details

Sequence:	AAAAPAAAAA SSEAPAASAT AEPEAGDQDS REVRVLQSLR GKICEAKNLL PYLGPHKMRD

Tag location is at the discretion of the manufacturer. If you have special request, please contact us.         Characteristics:       • Made in Germany - from design to production - by highly experienced protein experts.         • Human RASA2 Protein (raised in Insect Cells) purified by multi-step, protein-specific proto to ensure crystallization grade.         • State-of-the-art algorithm used for plasmid design (Gene synthesis).         This protein is a made to order protein and will be made for the first time for your order. O experts in the lab will ensure that you receive a correctly folded protein.         The big advantage of ordering our made-to-order proteins in comparison to ordering cust made proteins from other companies is that there is no financial obligation in case the proceannot be expressed or purified.         In the unlikely event that the protein cannot be expression process fo custom-made proteins, e.g. fees might apply for the expression plasmid, the first expressi experiments or purification optimization).         When you order this made-to-order protein you will only pay upon receival of the correctly folded protein. With no financial risk on your end you can rest assured that our experience protein experts will do everything to make sure that you receive the protein you ordered.	cess

folded protein. With no financial risk on your end you can rest assured that our experience protein experts will do everything to make sure that you receive the protein you ordered. The concentration of our recombinant proteins is measured using the absorbance at 280	
protein experts will do everything to make sure that you receive the protein you ordered. The concentration of our recombinant proteins is measured using the absorbance at 280	
The concentration of our recombinant proteins is measured using the absorbance at 280	ł
The protein's absorbance will be measured in several dilutions and is measured against it	m.
specific reference buffer.	
The concentration of the protein is calculated using its specific absorption coefficient. We	use
the Expasy's protparam tool to determine the absorption coefficient of each protein.	
Purification: Two step purification of proteins expressed in baculovirus infected SF9 insect cells:	
<ol> <li>In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE.</li> </ol>	
2. Protein containing fractions of the best purification are subjected to second purification through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE an Western blot.	
Purity: >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.	
Sterility: 0.22 µm filtered

Product Details	
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade

## Target Details

Target:	RASA2
Alternative Name:	RASA2 (RASA2 Products)
Background:	Inhibitory regulator of the Ras-cyclic AMP pathway. Binds inositol tetrakisphosphate (IP4).
Molecular Weight:	97.4 kDa Including tag.
UniProt:	Q15283
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
