## Datasheet for ABIN3087502 POLR2F Protein (AA 2-127) (His tag)

Image

Overview

| Quantity:                     | 1 mg  |
|-------------------------------|---|
| Target:                       | POLR2F  |
| Protein Characteristics:      | AA 2-127  |
| Origin:                       | Human   |
| Source:                       | Escherichia coli (E. coli)  |
| Protein Type:                 | Recombinant   |
| Purification tag / Conjugate: | This POLR2F protein is labelled with His tag.   |
| Application:                  | ELISA, Western Blotting (WB), SDS-PAGE (SDS), Crystallization (Crys)  |
| Product Details               |   |
| Sequence:                     | SDNEDNFDGD DFDDVEEDEG LDDLENAEEE GQENVEILPS GERPQANQKR ITTPYMTKYE   |
|                               | RARVLGTRAL QIAMCAPVMV ELEGETDPLL IAMKELKARK IPIIIRRYLP DGSYEDWGVD ELIITD  |
|                               | Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a  |
|                               | special request, please contact us.   |
| Characteristics:              | Made in Germany - from design to production - by highly experienced protein experts.  |
|                               | • Human POLR2F Protein (raised in E. Coli) purified by multi-step, protein-specific process to  |
|                               | ensure crystallization grade.   |
|                               | State-of-the-art algorithm used for plasmid design (Cane synthesis)   |
|                               | State-of-the-art algorithm used for plasmid design (Gene synthesis).  |
|                               | <ul> <li>State-of-the-art algorithm used for plasmid design (Gene synthesis).</li> <li>This protein is a made to order protein and will be made for the first time for your order. Our</li> </ul> |
|                               |   |
|                               | This protein is a made to order protein and will be made for the first time for your order. Our   |

| Product Details  |  |
|------------------|--|
|                  | cannot be expressed or purified.   |
|                  | In the unlikely event that the protein cannot be expressed or purified we do not charge anything   |
|                  | (other companies might charge you for any performed steps in the expression process for  |
|                  | custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression   |
|                  | experiments or purification optimization).   |
|                  | When you order this made-to-order protein you will only pay upon receival of the correctly   |
|                  | folded protein. With no financial risk on your end you can rest assured that our experienced   |
|                  | protein experts will do everything to make sure that you receive the protein you ordered.  |
|                  | The concentration of our recombinant proteins is measured using the absorbance at 280nm.   |
|                  | The protein's absorbance will be measured in several dilutions and is measured against its   |
|                  | specific reference buffer.   |
|                  | The concentration of the protein is calculated using its specific absorption coefficient. We use   |
|                  | the Expasy's protparam tool to determine the absorption coefficient of each protein.   |
| Purification:    | Two step purification of proteins expressed in bacterial culture:  |
|                  | <ol> <li>In a first purification step, the protein is purified from the cleared cell lysate using three<br/>different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate<br/>fractions are analyzed by SDS-PAGE.</li> </ol> |
|                  | <ol> <li>Protein containing fractions of the best purification are subjected to second purification step<br/>through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and<br/>Western blot.</li> </ol>                           |
| Purity:          | >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.   |
| Sterility:       | 0.22 µm filtered   |
| Endotoxin Level: | Endotoxin has not been removed. Please contact us if you require endotoxin removal.  |
| Grade:           | Crystallography grade  |

## Target Details

| Target:           | POLR2F  |
|-------------------|---|
| Alternative Name: | POLR2F (POLR2F Products)  |
| Background:       | DNA-dependent RNA polymerases catalyze the transcription of DNA into RNA using the four     |
|                   | ribonucleoside triphosphates as substrates. Common component of RNA polymerases I, II, and  |
|                   | III which synthesize ribosomal RNA precursors, mRNA precursors and many functional non-     |
|                   | coding RNAs, and small RNAs, such as 5S rRNA and tRNAs, respectively. Pol II is the central |
|                   | component of the basal RNA polymerase II transcription machinery. Pols are composed of      |

| Target Details      |  |
|---------------------|--|
|                     | mobile elements that move relative to each other. In Pol II, POLR2F/RPB6 is part of the clamp element and together with parts of RPB1 and RPB2 forms a pocket to which the RPB4-RPB7 subcomplex binds (By similarity). {EC0:0000250, EC0:0000269 PubMed:9852112}.  |
| Molecular Weight:   | 15.3 kDa Including tag.  |
| UniProt:            | P61218   |
| Pathways:           | Regulatory RNA Pathways  |
| Application Details |  |
| Application Notes:  | In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.   |
| Comment:            | In cases in which it is highly likely that the recombinant protein with the default tag will be<br>insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to<br>increase solubility. We will discuss all possible options with you in detail to assure that you<br>receive your protein of interest. |
| Restrictions:       | For Research Use only  |
| Handling            |  |
| Format:             | Liquid   |
| Buffer:             | 100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.   |
| Handling Advice:    | Avoid repeated freeze-thaw cycles.   |
| Storage:            | -80 °C   |
| Storage Comment:    | Store at -80°C.  |
| Expiry Date:        | Unlimited (if stored properly)   |
