This protein is a n	nade to order protein and will be made for the first time for your order. Our
experts in the lab	will ensure that you receive a correctly folded protein.
The big advantage	e of ordering our made-to-order proteins in comparison to ordering custom
made proteins fro	m other companies is that there is no financial obligation in case the protein
cannot be express	sed or purified.
In the unlikely eve	nt that the protein cannot be expressed or purified we do not charge anything
(other companies	might charge you for any performed steps in the expression process for
custom-made pro	teins, e.g. fees might apply for the expression plasmid, the first expression
experiments or pu	rification optimization).
When you order the	nis made-to-order protein you will only pay upon receival of the correctly
folded protein. Wi	th no financial risk on your end you can rest assured that our experienced
protein experts wi	II do everything to make sure that you receive the protein you ordered.
The concentration	n of our recombinant proteins is measured using the absorbance at 280nm.
The protein's abso	orbance will be measured in several dilutions and is measured against its
specific reference	buffer.
The concentration	of the protein is calculated using its specific absorption coefficient. We use
the Expasy's prot	param tool to determine the absorption coefficient of each protein.
Purification: Two step purifica	tion of proteins expressed in baculovirus infected SF9 insect cells:
·	ation step, the protein is purified from the cleared cell lysate using three g capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
	alyzed by SDS-PAGE.
	ing fractions of the best purification are subjected to second purification step clusion chromatography. Eluate fractions are analyzed by SDS-PAGE and
Purity: >95 % as determin	ned by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility: 0.22 µm filtered	
Endotoxin Level: Protein is endotox	tin free.
Grade: Crystallography g	rade

Target Details		
Molecular Weight:	48.6 kDa Including tag.	
UniProt:	Q6ZNF0	
Application Details		
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.	
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.	
Restrictions:	For Research Use only	
Handling		
Format:	Liquid	
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.	
Handling Advice:	Avoid repeated freeze-thaw cycles.	
Storage:	-80 °C	
Storage Comment:	Store at -80°C.
