# Datasheet for ABIN3088723 AKT3 Protein (AA 2-479) (His tag)

1 Image

#### Overview

Quantity:	1 mg
Target:	AKT3
Protein Characteristics:	AA 2-479
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This AKT3 protein is labelled with His tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys)

#### Product Details

## Target Details

Background:	AKT3 is one of 3 closely related serine/threonine-protein kinases (AKT1, AKT2 and AKT3) called
	the AKT kinase, and which regulate many processes including metabolism, proliferation, cell
	survival, growth and angiogenesis. This is mediated through serine and/or threonine
	phosphorylation of a range of downstream substrates. Over 100 substrate candidates have
	been reported so far, but for most of them, no isoform specificity has been reported. AKT3 is
	the least studied AKT isoform. It plays an important role in brain development and is crucial for
	the viability of malignant glioma cells. AKT3 isoform may also be the key molecule in up-
	regulation and down-regulation of MMP13 via IL13. Required for the coordination of
	mitochondrial biogenesis with growth factor-induced increases in cellular energy demands.
	Down-regulation by RNA interference reduces the expression of the phosphorylated form of
	BAD, resulting in the induction of caspase-dependent apoptosis.
	{ECO:0000269 PubMed:18524868, ECO:0000269 PubMed:21191416}.
Molecular Weight:	56.6 kDa Including tag.
UniProt:	Q9Y243
Pathways:	PI3K-Akt Signaling, RTK Signaling, TLR Signaling, Hepatitis C, VEGF Signaling
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a
	guarantee though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be
	insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to
	increase solubility. We will discuss all possible options with you in detail to assure that you
	receive your protein of interest.
Restrictions:	For Research Use only

### Handling

Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
