

Datasheet for ABIN3088837 Scinderin Protein (SCIN) (AA 1-715) (Strep Tag)

Overview

Quantity:	250 µg
Target:	Scinderin (SCIN)
Protein Characteristics:	AA 1-715
Origin:	Human
Source:	Cell-free protein synthesis (CFPS)
Protein Type:	Recombinant
Purification tag / Conjugate:	This Scinderin protein is labelled with Strep Tag.
Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS)

Product Details

Brand:	AliCE®
Sequence:	MARELYHEEF ARAGKQAGLQ VWRIEKLELV PVPQSAHGDF YVGDAYLVLH TAKTSRGFTY
	HLHFWLGKEC SQDESTAAAI FTVQMDDYLG GKPVQNRELQ GYESNDFVSY FKGGLKYKAG

Sequence without tag. The proposed Strep-Tag is based on experience s with the expression system, a different complexity of the protein could make another tag necessary. In case you have a special request, please contact us.

Characteristics: Key Benefits:

• Made in Germany - from design to production - by highly experienced protein experts.

- Protein expressed with ALiCE® and purified in one-step affinity chromatography
- These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Expression System:

- ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require posttranslational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
 protein production are removed, leaving only the protein production machinery and the
 mitochondria to drive the reaction. During our lysate completion steps, the additional
 components needed for protein production (amino acids, cofactors, etc.) are added to
 produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured against its specific reference buffer.
- We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.

Purification:

One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®).

Product Details

Purity:	> 70-80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC).
Grade:	custom-made

Target Details

Target:	Scinderin (SCIN)
Alternative Name:	SCIN (SCIN Products)
Background:	Scinderin (Adseverin),FUNCTION: Ca(2+)-dependent actin filament-severing protein that has a
	regulatory function in exocytosis by affecting the organization of the microfilament network
	underneath the plasma membrane (PubMed:8547642, PubMed:26365202). Severing activity is
	inhibited by phosphatidylinositol 4,5-bis-phosphate (PIP2) (By similarity). In vitro, also has
	barbed end capping and nucleating activities in the presence of Ca(2+). Required for
	megakaryocyte differentiation, maturation, polyploidization and apoptosis with the release of
	platelet-like particles (PubMed:11568009). Plays a role in osteoclastogenesis (OCG) and actin
	cytoskeletal organization in osteoclasts (By similarity). Regulates chondrocyte proliferation and
	differentiation (By similarity). Inhibits cell proliferation and tumorigenesis. Signaling is mediated
	by MAPK, p38 and JNK pathways (PubMed:11568009). {ECO:0000250 UniProtKB:Q28046,
	ECO:0000250 UniProtKB:Q5ZIV9, ECO:0000250 UniProtKB:Q60604,
	ECO:0000269 PubMed:11568009, ECO:0000269 PubMed:26365202,
	EC0:0000269 PubMed:8547642}.
Molecular Weight:	80.5 kDa
UniProt:	Q9Y6U3
Pathways:	Regulation of Actin Filament Polymerization
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a
	guarantee though.

Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer. Standard Storage Buffer: PBS pH 7.4, 10 % Glycerol Might differ depending on protein.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	12 months
