Datasheet for ABIN3088852 ALT Protein (AA 2-496) (His tag)

Image

Overview

Quantity:	1 mg
Target:	ALT
Protein Characteristics:	AA 2-496
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This ALT protein is labelled with His tag.
Application:	SDS-PAGE (SDS), Western Blotting (WB), ELISA, Crystallization (Crys)

Product Details

	special request, please contact us.
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a

 Characteristics: Made in Germany - from design to production - by highly experienced protein experienced protein (raised in Insect Cells) purified by multi-step, protein-specific pensure crystallization grade. State-of-the-art algorithm used for plasmid design (Gene synthesis). 	
This protein is a made to order protein and will be made for the first time for your orde	er. Our
experts in the lab will ensure that you receive a correctly folded protein.	
The big advantage of ordering our made-to-order proteins in comparison to ordering	custom
made proteins from other companies is that there is no financial obligation in case th cannot be expressed or purified.	e protein
In the unlikely event that the protein cannot be expressed or purified we do not charge	e anything
(other companies might charge you for any performed steps in the expression proces	, ,
custom-made proteins, e.g. fees might apply for the expression plasmid, the first exp	
experiments or purification optimization).	
When you order this made-to-order protein you will only pay upon receival of the corre	ectly
folded protein. With no financial risk on your end you can rest assured that our experi	enced
protein experts will do everything to make sure that you receive the protein you order	ed.
The concentration of our recombinant proteins is measured using the absorbance at	280nm.
The protein's absorbance will be measured in several dilutions and is measured agair specific reference buffer.	ıst its
The concentration of the protein is calculated using its specific absorption coefficient	. We use
the Expasy's protparam tool to determine the absorption coefficient of each protein.	
Purification: Two step purification of proteins expressed in baculovirus infected SF9 insect cells:	
 In a first purification step, the protein is purified from the cleared cell lysate using the different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluc fractions are analyzed by SDS-PAGE. 	
 Protein containing fractions of the best purification are subjected to second purific through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAG Western blot. 	•
Purity: >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blo	t.
Sterility: 0.22 µm filtered	
Endotoxin Level: Protein is endotoxin free.	
Grade: Crystallography grade

Target Details	
Target:	ALT
Alternative Name:	GPT (ALT Products)
Background:	Catalyzes the reversible transamination between alanine and 2-oxoglutarate to form pyruvate and glutamate. Participates in cellular nitrogen metabolism and also in liver gluconeogenesis starting with precursors transported from skeletal muscles (By similarity). {ECO:0000250}.
Molecular Weight:	55.5 kDa Including tag.
UniProt:	P24298
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
