Datasheet for ABIN3089353 ATP8B3 Protein (AA 1-149) (His tag)

Overview

Quantity:	1 mg
Target:	ATP8B3
Protein Characteristics:	AA 1-149
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This ATP8B3 protein is labelled with His tag.
Application:	Crystallization (Crys), ELISA, SDS-PAGE (SDS), Western Blotting (WB)
Product Details	
Sequence:	MGTGPAQTPR STRAGPEPSP APPGPGDTGD SDVTQEGSGP AGIRGGETVI RAGMGDSPGR
	GAPERRHKAQ PGRARKYEWR PEGPTSMGSL GQREDLQDED RNSAFTWKVQ ANNRAYNGQF
	KEKVILCWQR KKYKTNVIRT AKYNFYSFL
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.

Characteristics:

• Made in Germany - from design to production - by highly experienced protein experts.

- Human ATP8B3 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade.
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a made to order protein and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein. The big advantage of ordering our made-to-order proteins in comparison to ordering custom

	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	 In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE.
	 Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade
Farget Details	
Farget:	ATP8B3
Alternative Name:	ATP8B3 (ATP8B3 Products)
Background:	P4-ATPase flippase which catalyzes the hydrolysis of ATP coupled to the transport of
	aminophospholipids from the outer to the inner leaflet of various membranes and ensures the
	maintenance of asymmetric distribution of phospholipids. Phospholipid translocation seems
	also to be implicated in vesicle formation and in uptake of lipid signaling molecules. May be

Target Details	
	responsible for the maintenance of asymmetric distribution of phosphatidylserine (PS) in spermatozoa membranes. Involved in acrosome reactions and binding of spermatozoa to zona pellucida. {ECO:0000250 UniProtKB:Q6UQ17}.
Molecular Weight:	17.3 kDa Including tag.
UniProt:	060423
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
