Datasheet for ABIN3090207 CACNA1G Protein (AA 396-743) (His tag)

1 Image

Overview

Quantity:	1 mg
Target:	CACNA1G
Protein Characteristics:	AA 396-743
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This CACNA1G protein is labelled with His tag.
Application:	Crystallization (Crys), ELISA, SDS-PAGE (SDS), Western Blotting (WB)

Product Details

Sequence:	TQFSETKQRE SQLMREQRVR FLSNASTLAS FSEPGSCYEE LLKYLVYILR KAARRLAQVS RAAGVRVGLL SSPAPLGGQE TQPSSSCSRS HRRLSVHHLV HHHHHHHHHH HLGNGTLRAP RASPEIQDRD ANGSRRLMLP PPSTPALSGA PPGGAESVHS FYHADCHLEP VRCQAPPPRS PSEASGRTVG SGKVYPTVHT SPPPETLKEK ALVEVAASSG PPTLTSLNIP PGPYSSMHKL LETQSTGACQ SSCKISSPCL KADSGACGPD SCPYCARAGA GEVELADREM PDSDSEAVYE FTQDAQHSDL RDPHSRRQRS LGPDAEPSSV LAFWRLICDT FRKIVDSK
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a special request, please contact us.
Characteristics:	 Made in Germany - from design to production - by highly experienced protein experts. Human CACNA1G Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade. State-of-the-art algorithm used for plasmid design (Gene synthesis).

Product Details	
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three
	different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
	fractions are analyzed by SDS-PAGE.
	2. Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and
	Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 μm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade
Target Details	
Target:	CACNA1G
Alternative Name:	CACNA1G (CACNA1G Products)

Background: Voltage-sensitive calcium channels (VSCC) mediate the entry of calcium ions into excitable

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 2/4 | Product datasheet for ABIN3090207 | 09/11/2023 | Copyright antibodies-online. 	cells and are also involved in a variety of calcium-dependent processes, including muscle
	contraction, hormone or neurotransmitter release, gene expression, cell motility, cell division
	and cell death. The isoform alpha-1G gives rise to T-type calcium currents. T-type calcium
	channels belong to the "low-voltage activated (LVA)" group and are strongly blocked by
	mibefradil. A particularity of this type of channel is an opening at quite negative potentials and a
	voltage-dependent inactivation. T-type channels serve pacemaking functions in both central
	neurons and cardiac nodal cells and support calcium signaling in secretory cells and vascular
	smooth muscle. They may also be involved in the modulation of firing patterns of neurons
	which is important for information processing as well as in cell growth processes.
Molecular Weight:	38.8 kDa Including tag.
UniProt:	043497
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee
	though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be
	insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to
	increase solubility. We will discuss all possible options with you in detail to assure that you
	receive your protein of interest.
Restrictions:	For Research Use only

Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
