## Datasheet for ABIN3090328 CACNA1D Protein (AA 753-886) (His tag)

Overview

| 0.01.0100                     |   |
|-------------------------------|---|
| Quantity:                     | 1 mg  |
| Target:                       | CACNA1D   |
| Protein Characteristics:      | AA 753-886  |
| Origin:                       | Human   |
| Source:                       | Insect Cells  |
| Protein Type:                 | Recombinant   |
| Purification tag / Conjugate: | This CACNA1D protein is labelled with His tag.  |
| Application:                  | SDS-PAGE (SDS), Western Blotting (WB), Crystallization (Crys), ELISA  |
| Product Details               |   |
| Sequence:                     | DNLADAESLN TAQKEEAEEK ERKKIARKES LENKKNNKPE VNQIANSDNK VTIDDYREED   |
|                               | EDKDPYPPCD VPVGEEEEEE EEDEPEVPAG PRPRRISELN MKEKIAPIPE GSAFFILSKT   |
|                               | NPIRVGCHKL INHH   |
|                               | Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a  |
|                               | special request, please contact us.   |
| Characteristics:              | Made in Germany - from design to production - by highly experienced protein experts.  |
|                               | Human CACNA1D Protein (raised in Insect Cells) purified by multi-step, protein-specific   |
|                               | process to ensure crystallization grade.  |
|                               | State-of-the-art algorithm used for plasmid design (Gene synthesis).  |
|                               |   |
|                               | This protein is a made to order protein and will be made for the first time for your order. Our   |
|                               | This protein is a made to order protein and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein. |

|                   | made proteins from other companies is that there is no financial obligation in case the protein  |
|-------------------|--|
|                   | cannot be expressed or purified.   |
|                   | In the unlikely event that the protein cannot be expressed or purified we do not charge anything   |
|                   | (other companies might charge you for any performed steps in the expression process for  |
|                   | custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression   |
|                   | experiments or purification optimization).   |
|                   | When you order this made-to-order protein you will only pay upon receival of the correctly   |
|                   | folded protein. With no financial risk on your end you can rest assured that our experienced   |
|                   | protein experts will do everything to make sure that you receive the protein you ordered.  |
|                   | The concentration of our recombinant proteins is measured using the absorbance at 280nm.   |
|                   | The protein's absorbance will be measured in several dilutions and is measured against its   |
|                   | specific reference buffer.   |
|                   | The concentration of the protein is calculated using its specific absorption coefficient. We use   |
|                   | the Expasy's protparam tool to determine the absorption coefficient of each protein.   |
| Purification:     | Two step purification of proteins expressed in baculovirus infected SF9 insect cells:  |
|                   | <ol> <li>In a first purification step, the protein is purified from the cleared cell lysate using three<br/>different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate<br/>fractions are analyzed by SDS-PAGE.</li> </ol> |
|                   | <ol> <li>Protein containing fractions of the best purification are subjected to second purification step<br/>through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and<br/>Western blot.</li> </ol>                           |
| Purity:           | >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.   |
| Sterility:        | 0.22 µm filtered   |
| Endotoxin Level:  | Protein is endotoxin free.   |
| Grade:            | Crystallography grade  |
| Farget Details    |  |
| arget:            | CACNA1D  |
| Alternative Name: | CACNA1D (CACNA1D Products)   |
| Background:       | Voltage-sensitive calcium channels (VSCC) mediate the entry of calcium ions into excitable   |
|                   | cells and are also involved in a variety of calcium-dependent processes, including muscle  |
|                   | contraction, hormone or neurotransmitter release, gene expression, cell motility, cell division  |
|                   | and cell death. The isoform alpha-1D gives rise to L-type calcium currents. Long-lasting (L-type   |

## Target Details

|                     | calcium channels belong to the 'high-voltage activated' (HVA) group. They are blocked by          |
|---------------------|---|
|                     | dihydropyridines (DHP), phenylalkylamines, benzothiazepines, and by omega-agatoxin-IIIA           |
|                     | (omega-Aga-IIIA). They are however insensitive to omega-conotoxin-GVIA (omega-CTx-GVIA)           |
|                     | and omega-agatoxin-IVA (omega-Aga-IVA). {ECO:0000269 PubMed:18482979}.                            |
| Molecular Weight:   | 16.3 kDa Including tag.   |
| UniProt:            | Q01668  |
| Pathways:           | Sensory Perception of Sound   |
| Application Details |   |
| Application Notes:  | In addition to the applications listed above we expect the protein to work for functional studies |
|                     | as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee |
|                     | though.   |
| Comment:            | In cases in which it is highly likely that the recombinant protein with the default tag will be   |
|                     | insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to     |
|                     | increase solubility. We will discuss all possible options with you in detail to assure that you   |
|                     | receive your protein of interest.   |
| Restrictions:       | For Research Use only   |
| Handling            |   |
| Format:             | Liquid  |
| Buffer:             | 100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.        |
| Handling Advice:    | Avoid repeated freeze-thaw cycles.  |
| Storage:            | -80 °C  |
| Storage Comment:    | Store at -80°C.   |
| Expiry Date:        | Unlimited (if stored properly)  |

**Image 1.** "Crystallography Grade" protein due to multi-step, protein-specific purification process
