

Datasheet for ABIN3090410 CHAF1A Protein (AA 1-956) (Strep Tag)

Overview

Quantity:	250 µg
Target:	CHAF1A
Protein Characteristics:	AA 1-956
Origin:	Human
Source:	Cell-free protein synthesis (CFPS)
Protein Type:	Recombinant
Purification tag / Conjugate:	This CHAF1A protein is labelled with Strep Tag.
Application:	ELISA, SDS-PAGE (SDS), Western Blotting (WB)

Product Details

Brand:	AliCE®
Sequence:	MLEELECGAP GARGAATAMD CKDRPAFPVK KLIQARLPFK RLNLVPKGKA DDMSDDQGTS
	VQSKSPDLEA SLDTLENNCH VGSDIDFRPK LVNGKGPLDN FLRNRIETSI GQSTVIIDLT

QKLKAKEWDE FLAKGKRFRV LQPVKIGCVW AADRDCAGDD LKVLQQFAAC FLETLPAQEE QTPKASKRER RDEQILAQLL PLLHGNVNGS KVIIREFQEH CRRGLLSNHT GSPRSPSTTY LHTPTPSEDA AIPSKSRLKR LISENSVYEK RPDFRMCWYV HPQVLQSFQQ EHLPVPCQWS YVTSVPSAPK EDSGSVPSTG PSQGTPISLK RKSAGSMCIT QFMKKRRHDG QIGAEDMDGF QADTEEEEEE EGDCMIVDVP DAAEVQAPCG AASGAGGGVG VDTGKATLTA SPLGAS Sequence without tag. The proposed Strep-Tag is based on experience s with the expression system, a different complexity of the protein could make another tag necessary. In case you have a special request, please contact us.

Characteristics:

Key Benefits:

- Made in Germany from design to production by highly experienced protein experts.
- · Protein expressed with ALiCE® and purified in one-step affinity chromatography
- These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Expression System:

- ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require posttranslational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
 protein production are removed, leaving only the protein production machinery and the
 mitochondria to drive the reaction. During our lysate completion steps, the additional
 components needed for protein production (amino acids, cofactors, etc.) are added to
 produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured against its specific reference buffer.
- We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.

Purification:	One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®).
Purity:	> 70-80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC).
Grade:	custom-made

Target Details

Target:	CHAF1A
Alternative Name:	CHAF1A (CHAF1A Products)
Background:	Chromatin assembly factor 1 subunit A (CAF-1 subunit A) (Chromatin assembly factor I p150
	subunit) (CAF-I 150 kDa subunit) (CAF-I p150) (hp150),FUNCTION: Core component of the CAF-
	1 complex, a complex that is thought to mediate chromatin assembly in DNA replication and
	DNA repair. Assembles histone octamers onto replicating DNA in vitro. CAF-1 performs the first
	step of the nucleosome assembly process, bringing newly synthesized histones H3 and H4 to
	replicating DNA, histones H2A/H2B can bind to this chromatin precursor subsequent to DNA
	replication to complete the histone octamer. It may play a role in heterochromatin maintenance
	in proliferating cells by bringing newly synthesized cbx proteins to heterochromatic DNA
	replication foci. {ECO:0000250 UniProtKB:Q5R1T0}.
Molecular Weight:	106.9 kDa
UniProt:	Q13111
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a
	guarantee though.
Comment:	ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from
	Nicotiana tabacum c.v This contains all the protein expression machinery needed to produce
	even the most difficult-to-express proteins, including those that require post-translational
	modifications.

	components needed for protein production (amino acids, cofactors, etc.) are added to produce something that functions like a cell, but without the constraints of a living system - all that's needed is the DNA that codes for the desired protein!
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer. Standard Storage Buffer: PBS pH 7.4, 10 % Glycerol Might differ depending on protein.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	12 months
