

Datasheet for ABIN3090442 BRAP Protein (AA 1-592) (Strep Tag)

Overview

Quantity:	250 µg
Target:	BRAP
Protein Characteristics:	AA 1-592
Origin:	Human
Source:	Cell-free protein synthesis (CFPS)
Protein Type:	Recombinant
Purification tag / Conjugate:	This BRAP protein is labelled with Strep Tag.
Application:	SDS-PAGE (SDS), ELISA, Western Blotting (WB)

Product Details

Brand:	AliCE®
Sequence:	MSVSLVVIRL ELAEHSPVPA GFGFSAAAGE MSDEEIKKTT LASAVACLEG KSPGEKVAII
	HQHLGRREMT DVIIETMKSN PDELKTTVEE RKSSEASPTA QRSKDHSKEC INAAPDSPSK
	QLPDQISFFS GNPSVEIVHG IMHLYKTNKM TSLKEDVRRS AMLCILTVPA AMTSHDLMKF
	VAPFNEVIEQ MKIIRDSTPN QYMVLIKFRA QADADSFYMT CNGRQFNSIE DDVCQLVYVE
	RAEVLKSEDG ASLPVMDLTE LPKCTVCLER MDESVNGILT TLCNHSFHSQ CLQRWDDTTC
	PVCRYCQTPE PVEENKCFEC GVQENLWICL ICGHIGCGRY VSRHAYKHFE ETQHTYAMQL
	TNHRVWDYAG DNYVHRLVAS KTDGKIVQYE CEGDTCQEEK IDALQLEYSY LLTSQLESQR
	IYWENKIVRI EKDTAEEINN MKTKFKETIE KCDNLEHKLN DLLKEKQSVE RKCTQLNTKV
	AKLTNELKEE QEMNKCLRAN QVLLQNKLKE EERVLKETCD QKDLQITEIQ EQLRDVMFYL
	ETQQKINHLP AETRQEIQEG QINIAMASAS SPASSGGSGK LPSRKGRSKR GK
	Sequence without tag. The proposed Strep-Tag is based on experience s with the expression

	system, a different complexity of the protein could make another tag necessary. In case you
	have a special request, please contact us.
Characteristics:	Key Benefits:
	 Made in Germany - from design to production - by highly experienced protein experts. Protein expressed with ALiCE® and purified in one-step affinity chromatography These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed). State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made-to-order protein and will be made for the first time for your order. Our
	experts in the lab try to ensure that you receive soluble protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	Expression System:
	 ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require post-translational modifications. During lysate production, the cell wall and other cellular components that are not required fo protein production are removed, leaving only the protein production machinery and the mitochondria to drive the reaction. During our lysate completion steps, the additional components needed for protein production (amino acids, cofactors, etc.) are added to produce something that functions like a cell, but without the constraints of a living system - all that's needed is the DNA that codes for the desired protein!
	Concentration:
	 The concentration of our recombinant proteins is measured using the absorbance at 280nm The protein's absorbance will be measured against its specific reference buffer. We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.
Purification:	One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®).
Purity:	> 70-80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC).

Grade:

custom-made

Target Details

Target:	BRAP
Alternative Name:	BRAP (BRAP Products)
Background:	 BRCA1-associated protein (EC 2.3.2.27) (BRAP2) (Impedes mitogenic signal propagation) (IMP) (RING finger protein 52) (RING-type E3 ubiquitin transferase BRAP2) (Renal carcinoma antigen NY-REN-63),FUNCTION: Negatively regulates MAP kinase activation by limiting the formation of Raf/MEK complexes probably by inactivation of the KSR1 scaffold protein. Also acts as a Ras responsive E3 ubiquitin ligase that, on activation of Ras, is modified by auto-polyubiquitination resulting in the release of inhibition of Raf/MEK complex formation. May also act as a cytoplasmic retention protein with a role in regulating nuclear transport. {ECO:0000269 PubMed:14724641, ECO:0000303 PubMed:10777491}.
Molecular Weight:	67.3 kDa
UniProt:	Q7Z569
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.
Comment:	 ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require post-translational modifications. During lysate production, the cell wall and other cellular components that are not required for protein production are removed, leaving only the protein production machinery and the mitochondria to drive the reaction. During our lysate completion steps, the additional components needed for protein production (amino acids, cofactors, etc.) are added to produce something that functions like a cell, but without the constraints of a living system - all that's needed is the DNA that codes for the desired protein!
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer.

Handling

	Standard Storage Buffer: PBS pH 7.4, 10 % Glycerol Might differ depending on protein.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	12 months
