

## Datasheet for ABIN3090638 Calreticulin Protein (CALR) (AA 18-417) (His tag)

Overview

| Uverview                      |   |
|-------------------------------|---|
| Quantity:                     | 1 mg  |
| Target:                       | Calreticulin (CALR)   |
| Protein Characteristics:      | AA 18-417   |
| Origin:                       | Human   |
| Source:                       | Insect Cells  |
| Protein Type:                 | Recombinant   |
| Purification tag / Conjugate: | This Calreticulin protein is labelled with His tag.   |
| Application:                  | SDS-PAGE (SDS), Western Blotting (WB), ELISA, Crystallization (Crys)  |
| Product Details               |   |
| Sequence:                     | EPAVYFKEQF LDGDGWTSRW IESKHKSDFG KFVLSSGKFY GDEEKDKGLQ TSQDARFYAL   |
|                               | SASFEPFSNK GQTLVVQFTV KHEQNIDCGG GYVKLFPNSL DQTDMHGDSE YNIMFGPDIC   |
|                               | GPGTKKVHVI FNYKGKNVLI NKDIRCKDDE FTHLYTLIVR PDNTYEVKID NSQVESGSLE   |
|                               | DDWDFLPPKK IKDPDASKPE DWDERAKIDD PTDSKPEDWD KPEHIPDPDA KKPEDWDEEM   |
|                               | DGEWEPPVIQ NPEYKGEWKP RQIDNPDYKG TWIHPEIDNP EYSPDPSIYA YDNFGVLGLD   |
|                               | LWQVKSGTIF DNFLITNDEA YAEEFGNETW GVTKAAEKQM KDKQDEEQRL KEEEEDKKRK   |
|                               | EEEEAEDKED DEDKDEDEED EEDKEEDEEE DVPGQAKDEL   |
|                               | Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a  |
|                               | special request, please contact us.   |
| Characteristics:              | <ul> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> <li>Human CALR Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade.</li> </ul> |

|                   | • State-of-the-art algorithm used for plasmid design (Gene synthesis).  |
|-------------------|---|
|                   | This protein is a made to order protein and will be made for the first time for your order. Our   |
|                   | experts in the lab will ensure that you receive a correctly folded protein.   |
|                   | The big advantage of ordering our made-to-order proteins in comparison to ordering custom   |
|                   | made proteins from other companies is that there is no financial obligation in case the protein   |
|                   | cannot be expressed or purified.  |
|                   | In the unlikely event that the protein cannot be expressed or purified we do not charge anything  |
|                   | (other companies might charge you for any performed steps in the expression process for   |
|                   | custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression  |
|                   | experiments or purification optimization).  |
|                   | When you order this made-to-order protein you will only pay upon receival of the correctly  |
|                   | folded protein. With no financial risk on your end you can rest assured that our experienced  |
|                   | protein experts will do everything to make sure that you receive the protein you ordered.   |
|                   | The concentration of our recombinant proteins is measured using the absorbance at 280nm.  |
|                   | The protein's absorbance will be measured in several dilutions and is measured against its  |
|                   | specific reference buffer.  |
|                   | The concentration of the protein is calculated using its specific absorption coefficient. We use  |
|                   | the Expasy's protparam tool to determine the absorption coefficient of each protein.  |
| Purification:     | Two step purification of proteins expressed in baculovirus infected SF9 insect cells:   |
|                   | 1. In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate |
|                   | fractions are analyzed by SDS-PAGE.<br>2. Protein containing fractions of the best purification are subjected to second purification step   |
|                   | through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.  |
| Purity:           | >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.  |
| Sterility:        | 0.22 µm filtered  |
| Endotoxin Level:  | Protein is endotoxin free.  |
| Grade:            | Crystallography grade   |
| Target Details    |   |
| Target:           | Calreticulin (CALR)   |
| Alternative Name: | CALR (CALR Products)  |
|                   |   |

## Target Details

| Background:         | Calcium-binding chaperone that promotes folding, oligomeric assembly and quality control in       |
|---------------------|---|
|                     | the endoplasmic reticulum (ER) via the calreticulin/calnexin cycle. This lectin interacts         |
|                     | transiently with almost all of the monoglucosylated glycoproteins that are synthesized in the     |
|                     | ER. Interacts with the DNA-binding domain of NR3C1 and mediates its nuclear export. Involved      |
|                     | in maternal gene expression regulation. May participate in oocyte maturation via the regulation   |
|                     | of calcium homeostasis (By similarity). {ECO:0000250, ECO:0000269 PubMed:11149926,                |
|                     | ECO:0000269 PubMed:7876246}.  |
| Molecular Weight:   | 47.4 kDa Including tag.   |
| UniProt:            | P27797  |
| Pathways:           | Retinoic Acid Receptor Signaling Pathway, Intracellular Steroid Hormone Receptor Signaling        |
|                     | Pathway, Regulation of Intracellular Steroid Hormone Receptor Signaling, Nuclear Hormone          |
|                     | Receptor Binding, ER-Nucleus Signaling, Unfolded Protein Response                                 |
| Application Details |   |
| Application Notes:  | In addition to the applications listed above we expect the protein to work for functional studies |
|                     | as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee |
|                     | though.   |
| Comment:            | In cases in which it is highly likely that the recombinant protein with the default tag will be   |
|                     | insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to     |
|                     | increase solubility. We will discuss all possible options with you in detail to assure that you   |
|                     | receive your protein of interest.   |
| Restrictions:       | For Research Use only   |
| Handling            |   |
| Format:             | Liquid  |
| Buffer:             | 100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.        |
| Handling Advice:    | Avoid repeated freeze-thaw cycles.  |
| Storage:            | -80 °C  |
| Storage Comment:    | Store at -80°C.   |
| Expiry Date:        | Unlimited (if stored properly)  |
|                     |   |
