Datasheet for ABIN3091371 CHST6 Protein (AA 27-395) (His tag)

Image

Overview

Quantity:	1 mg
Target:	CHST6
Protein Characteristics:	AA 27-395
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This CHST6 protein is labelled with His tag.
Application:	ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS)

Product Details

Sequence:	SRPGPSSPAG GEARVHVLVL SSWRSGSSFV GQLFNQHPDV FYLMEPAWHV WTTLSQGSAA
	TLHMAVRDLV RSVFLCDMDV FDAYLPWRRN LSDLFQWAVS RALCSPPACS AFPRGAISSE
	AVCKPLCARQ SFTLAREACR SYSHVVLKEV RFFNLQVLYP LLSDPALNLR IVHLVRDPRA
	VLRSREQTAK ALARDNGIVL GTNGTWVEAD PGLRVVREVC RSHVRIAEAA TLKPPPFLRG
	RYRLVRFEDL AREPLAEIRA LYAFTGLSLT PQLEAWIHNI THGSGPGARR EAFKTSSRNA
	LNVSQAWRHA LPFAKIRRVQ ELCAGALQLL GYRPVYSEDE QRNLALDLVL PRGLNGFTWA
	SSTASHPRN
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	 Made in Germany - from design to production - by highly experienced protein experts. Human CHST6 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade.

This protein is a made to order protein and will be made for the first time	e for your order. Our
experts in the lab will ensure that you receive a correctly folded protein.	
The big advantage of ordering our made-to-order proteins in comparisor	n to ordering custom
made proteins from other companies is that there is no financial obligati	ion in case the protein
cannot be expressed or purified.	
In the unlikely event that the protein cannot be expressed or purified we	do not charge anything
(other companies might charge you for any performed steps in the expre	ession process for
custom-made proteins, e.g. fees might apply for the expression plasmid,	, the first expression
experiments or purification optimization).	
When you order this made-to-order protein you will only pay upon receive	al of the correctly
folded protein. With no financial risk on your end you can rest assured th	nat our experienced
protein experts will do everything to make sure that you receive the prote	ein you ordered.
The concentration of our recombinant proteins is measured using the ab	bsorbance at 280nm.
The protein's absorbance will be measured in several dilutions and is me	easured against its
specific reference buffer.	
The concentration of the protein is calculated using its specific absorption	on coefficient. We use
the Expasy's protparam tool to determine the absorption coefficient of e	each protein.
Purification: Two step purification of proteins expressed in baculovirus infected SF9 i	insect cells:
1. In a first purification step, the protein is purified from the cleared cell ly	ysate using three
different His-tag capture materials: high yield, EDTA resistant, or DTT r	resistant. Eluate
fractions are analyzed by SDS-PAGE. 2. Protein containing fractions of the best purification are subjected to se	econd purification step
through size exclusion chromatography. Eluate fractions are analyzed	
Western blot.	
Purity: >95 % as determined by SDS PAGE, Size Exclusion Chromatography and	Western Blot.
Sterility: 0.22 µm filtered	
Endotoxin Level: Protein is endotoxin free.	
Grade: Crystallography grade	
Target Details	
Target: CHST6	
Alternative Name: CHST6 (CHST6 Products)

Target Details

Background:	Sulfotransferase that utilizes 3'-phospho-5'-adenylyl sulfate (PAPS) as sulfonate donor to
	catalyze the transfer of sulfate to position 6 of non-reducing N-acetylglucosamine (GlcNAc)
	residues of keratan. Mediates sulfation of keratan in cornea. Keratan sulfate plays a central role
	in maintaining corneal transparency. Acts on the non-reducing terminal GlcNAc of short and
	long carbohydrate substrates that have poly-N-acetyllactosamine structures.
	{EC0:0000269 PubMed:11352640, EC0:0000269 PubMed:12218059}.
Molecular Weight:	42.2 kDa Including tag.
UniProt:	Q9GZX3
Pathways:	Glycosaminoglycan Metabolic Process

Application Details

Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only

Handling

Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
