Datasheet for ABIN3091541 CHMP2B Protein (AA 2-213) (His tag)

1 Image

Overview

overview	
Quantity:	1 mg
Target:	CHMP2B
Protein Characteristics:	AA 2-213
Origin:	Human
Source:	Escherichia coli (E. coli)
Protein Type:	Recombinant
Purification tag / Conjugate:	This CHMP2B protein is labelled with His tag.
Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS), Crystallization (Crys)
Product Details	
Sequence:	ASLFKKKTVD DVIKEQNREL RGTQRAIIRD RAALEKQEKQ LELEIKKMAK IGNKEACKVL
	AKQLVHLRKQ KTRTFAVSSK VTSMSTQTKV MNSQMKMAGA MSTTAKTMQA VNKKMDPQKT
	LQTMQNFQKE NMKMEMTEEM INDTLDDIFD GSDDEEESQD IVNQVLDEIG IEISGKMAKA
	PSAARSLPSA STSKATISDE EIERQLKALG VD
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	Made in Germany - from design to production - by highly experienced protein experts.
	 Human CHMP2B Protein (raised in E. Coli) purified by multi-step, protein-specific process to ensure crystallization grade.
	State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 1/4 | Product datasheet for ABIN3091541 | 09/11/2023 | Copyright antibodies-online. 	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in bacterial culture:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three
	different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
	fractions are analyzed by SDS-PAGE. 2. Protein containing fractions of the best purification are subjected to second purification step
	through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and
	Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Endotoxin has not been removed. Please contact us if you require endotoxin removal.
Grade:	Crystallography grade
Target Details	
Target:	CHMP2B
Alternative Name:	CHMP2B (CHMP2B Products)

Background:	Probable core component of the endosomal sorting required for transport complex III (ESCRT-
	III) which is involved in multivesicular bodies (MVBs) formation and sorting of endosomal cargo
	proteins into MVBs. MVBs contain intraluminal vesicles (ILVs) that are generated by

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 2/4 | Product datasheet for ABIN3091541 | 09/11/2023 | Copyright antibodies-online. All rights reserved.

	invagination and scission from the limiting membrane of the endosome and mostly are
	delivered to lysosomes enabling degradation of membrane proteins, such as stimulated growth
	factor receptors, lysosomal enzymes and lipids. The MVB pathway appears to require the
	sequential function of ESCRT-0, -I,-II and -III complexes. ESCRT-III proteins mostly dissociate
	from the invaginating membrane before the ILV is released. The ESCRT machinery also
	functions in topologically equivalent membrane fission events, such as the terminal stages of
	cytokinesis and the budding of enveloped viruses (HIV-1 and other lentiviruses). ESCRT-III
	proteins are believed to mediate the necessary vesicle extrusion and/or membrane fission
	activities, possibly in conjunction with the AAA ATPase VPS4.
Molecular Weight:	24.7 kDa Including tag.
UniProt:	Q9UQN3
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee
	though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be
	insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to
	increase solubility. We will discuss all possible options with you in detail to assure that you
	receive your protein of interest.
Restrictions:	For Research Use only
Restrictions.	

Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
