# Datasheet for ABIN3091737 CLCA2 Protein (AA 32-901) (His tag)

#### Overview

Quantity:	1 mg	
Target:	CLCA2	
Protein Characteristics:	AA 32-901	
Origin:	Human	
Source:	Insect Cells	
Protein Type:	Recombinant	
Purification tag / Conjugate:	This CLCA2 protein is labelled with His tag.	
Application:	ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS)	

#### Product Details

	VLGVPAGPHP DVFPPCKIID LEAVKVEEEL TLSWTAPGED FDQGQATSYE IRMSKSLQNI		
	QDDFNNAILV NTSKRNPQQA GIREIFTFSP QISTNGPEHQ PNGETHESHR IYVAIRAMDR		
	NSLQSAVSNI AQAPLFIPPN SDPVPARDYL		
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a		
	special request, please contact us.		
Characteristics:	<ul> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> <li>Human CLCA2 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade.</li> <li>State-of-the-art algorithm used for plasmid design (Gene synthesis).</li> </ul>		
	This protein is a made to order protein and will be made for the first time for your order. Our		
	experts in the lab will ensure that you receive a correctly folded protein.		
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom		
	made proteins from other companies is that there is no financial obligation in case the protein		
	cannot be expressed or purified.		
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything		
	(other companies might charge you for any performed steps in the expression process for		
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression		
	experiments or purification optimization).		
	When you order this made-to-order protein you will only pay upon receival of the correctly		
	folded protein. With no financial risk on your end you can rest assured that our experienced		
	protein experts will do everything to make sure that you receive the protein you ordered.		
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.		
	The protein's absorbance will be measured in several dilutions and is measured against its		
	specific reference buffer.		
	The concentration of the protein is calculated using its specific absorption coefficient. We use		
	the Expasy's protparam tool to determine the absorption coefficient of each protein.		
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:		
	<ol> <li>In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE.</li> </ol>		
	2. Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.		
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.		
Sterility:	0.22 µm filtered

Product Details		
Endotoxin Level:	Protein is endotoxin free.	
Grade:	Crystallography grade	

## Target Details

Target:	CLCA2	
Alternative Name:	CLCA2 (CLCA2 Products)	
Background:	Plays a role in modulating chloride current across the plasma membrane in a calcium-	
	dependent manner, and cell adhesion. Involved in basal cell adhesion and/or stratification of	
	squamous epithelia. May act as a tumor suppressor in breast and colorectal cancer. Plays a	
	key role for cell adhesion in the beginning stages of lung metastasis via the binding to ITGB4.	
	{EC0:0000269 PubMed:10554024, EC0:0000269 PubMed:11320086,	
	ECO:0000269 PubMed:11445004, ECO:0000269 PubMed:15707651,	
	EC0:0000269 PubMed:16158324}.	
Molecular Weight:	97.0 kDa Including tag.	
UniProt:	Q9UQC9	
Application Details		
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies	
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee	
	though.	
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be	
	insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to	
	increase solubility. We will discuss all possible options with you in detail to assure that you	
	receive your protein of interest.	
Restrictions:	For Research Use only	

### Handling

Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
