antibodies

Datasheet for ABIN3091760 CNOT7 Protein (AA 1-285) (Strep Tag)

Overview

Quantity:	1 mg
Target:	CNOT7
Protein Characteristics:	AA 1-285
Origin:	Human
Source:	Tobacco (Nicotiana tabacum)
Protein Type:	Recombinant
Purification tag / Conjugate:	This CNOT7 protein is labelled with Strep Tag.
Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS)

Product Details

Sequence:	MPAATVDHSQ RICEVWACNL DEEMKKIRQV IRKYNYVAMD TEFPGVVARP IGEFRSNADY
	QYQLLRCNVD LLKIIQLGLT FMNEQGEYPP GTSTWQFNFK FNLTEDMYAQ DSIELLTTSG
	IQFKKHEEEG IETQYFAELL MTSGVVLCEG VKWLSFHSGY DFGYLIKILT NSNLPEEELD
	FFEILRLFFP VIYDVKYLMK SCKNLKGGLQ EVAEQLELER IGPQHQAGSD SLLTGMAFFK
	MREMFFEDHI DDAKYCGHLY GLGSGSSYVQ NGTGNAYEEE ANKQS
	Sequence without tag. The proposed Strep-Tag is based on experience s with the expression
	system, a different complexity of the protein could make another tag necessary. In case you
	have a special request, please contact us.
Characteristics:	Key Benefits:
	Ney Denemo.
	 Made in Germany - from design to production - by highly experienced protein experts.

- These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein. The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Expression System:

- ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require post-translational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
 protein production are removed, leaving only the protein production machinery and the
 mitochondria to drive the reaction. During our lysate completion steps, the additional
 components needed for protein production (amino acids, cofactors, etc.) are added to
 produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer.
- We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.

Purification:	Two step purification of proteins expressed in Almost Living Cell-Free Expression System
	(ALICE®):
	 In a first purification step, the protein is purified from the cleared cell lysate using StrepTag capture material. Eluate fractions are analyzed by SDS-PAGE.
	 Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.
Purity:	>80 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Endotoxin Level:	Low Endotoxin less than 1 EU/mg (< 0.1 ng/mg)

Product Details

Grade:

Crystallography grade

Target Details

Target:	CNOT7
Alternative Name:	CNOT7 (CNOT7 Products)
Background:	CCR4-NOT transcription complex subunit 7 (EC 3.1.13.4) (BTG1-binding factor 1) (CCR4-
	associated factor 1) (CAF-1) (Caf1a),FUNCTION: Has 3'-5' poly(A) exoribonuclease activity for
	synthetic poly(A) RNA substrate (PubMed:20634287, PubMed:31439799, PubMed:19276069)
	Its function seems to be partially redundant with that of CNOT8 (PubMed:19605561). Catalyti
	component of the CCR4-NOT complex which is one of the major cellular mRNA deadenylases
	and is linked to various cellular processes including bulk mRNA degradation, miRNA-mediated
	repression, translational repression during translational initiation and general transcription
	regulation (PubMed:20634287, PubMed:31439799, PubMed:19276069). During miRNA-
	mediated repression the complex seems also to act as translational repressor during
	translational initiation (PubMed:20065043). Additional complex functions may be a
	consequence of its influence on mRNA expression (PubMed:23236473, PubMed:19276069).
	Associates with members of the BTG family such as TOB1 and BTG2 and is required for their
	anti-proliferative activity (PubMed:23236473, PubMed:19276069).
	{EC0:0000269 PubMed:19276069, EC0:0000269 PubMed:19605561,
	EC0:0000269 PubMed:20065043, EC0:0000269 PubMed:20634287,
	ECO:0000269 PubMed:23236473, ECO:0000269 PubMed:31439799}.
Molecular Weight:	32.7 kDa
JniProt:	Q9UIV1
Pathways:	Ribonucleoprotein Complex Subunit Organization
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studie
	as well. As the protein has not been tested for functional studies yet we cannot offer a
	guarantee though.
Comment:	ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from
	Nicotiana tabacum c.v This contains all the protein expression machinery needed to produce
	even the most difficult-to-express proteins, including those that require post-translational
	modifications.

protein production are removed, leaving only the protein production machinery and the
mitochondria to drive the reaction. During our lysate completion steps, the additional
components needed for protein production (amino acids, cofactors, etc.) are added to produce
something that functions like a cell, but without the constraints of a living system - all that's
needed is the DNA that codes for the desired protein!

Restrictions:

For Research Use only

Handling

Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer. If you have a special request, please contact us.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
