# Datasheet for ABIN3092068 DDR2 Protein (AA 422-855) (His tag)

#### Overview

Quantity:	1 mg
Target:	DDR2
Protein Characteristics:	AA 422-855
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This DDR2 protein is labelled with His tag.
Application:	SDS-PAGE (SDS), Western Blotting (WB), ELISA, Crystallization (Crys)

### Product Details

	Human DDR2 Protein (raised in Insect Cells) purified by multi-step, protein-specific process
Characteristics:	• Made in Germany - from design to production - by highly experienced protein experts.
	special request, please contact us.
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a

to ensure crystallization grade.

• State-of-the-art algorithm used for plasmid design (Gene synthesis).

	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three
	different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
	fractions are analyzed by SDS-PAGE. 2. Protein containing fractions of the best purification are subjected to second purification step
	through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and
	Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade
Target Details	
Target:	DDR2
Alternative Name:	DDR2 (DDR2 Products)

# Target Details

Background:	Tyrosine kinase that functions as cell surface receptor for fibrillar collagen and regulates cell
	differentiation, remodeling of the extracellular matrix, cell migration and cell proliferation.
	Required for normal bone development. Regulates osteoblast differentiation and chondrocyte
	maturation via a signaling pathway that involves MAP kinases and leads to the activation of the
	transcription factor RUNX2. Regulates remodeling of the extracellular matrix by up-regulation of
	the collagenases MMP1, MMP2 and MMP13, and thereby facilitates cell migration and tumor
	cell invasion. Promotes fibroblast migration and proliferation, and thereby contributes to
	cutaneous wound healing. {ECO:0000269 PubMed:16186104,
	ECO:0000269 PubMed:16186108, ECO:0000269 PubMed:17665456,

	ECO:0000269 PubMed:20564243, ECO:0000269 PubMed:20734453,
	ECO:0000269 PubMed:9659899}.
Molecular Weight:	50.2 kDa Including tag.
UniProt:	Q16832
Pathways:	RTK Signaling
Application Details	

Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only

## Handling

Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
