

Datasheet for ABIN3092251 EFR3B Protein (AA 1-817) (Strep Tag)

Overview

| Quantity: | 250 µg |
|-------------------------------|--|
| Target: | EFR3B |
| Protein Characteristics: | AA 1-817 |
| Origin: | Human |
| Source: | Cell-free protein synthesis (CFPS) |
| Protein Type: | Recombinant |
| Purification tag / Conjugate: | This EFR3B protein is labelled with Strep Tag. |
| Application: | ELISA, SDS-PAGE (SDS), Western Blotting (WB) |

Product Details

| Brand: | AliCE® |

SEVLGGSGYN SDRLCLPYIP QLTDEDRLSK RRSIGETISL QVEVESRNSP EKEERVPAEE ITYETLKKAI VDSVAVEEQE RERRRQVVEK FQKAPFEEIA AHCGARASLL QSKLNQIFEI TIRPPPSPSG TITAAYGQPQ NHSIPVYEMK FPDLCVY Sequence without tag. The proposed Strep-Tag is based on experience s with the expression

system, a different complexity of the protein could make another tag necessary. In case you have a special request, please contact us.

Characteristics:

Key Benefits:

- Made in Germany from design to production by highly experienced protein experts.
- Protein expressed with ALiCE® and purified in one-step affinity chromatography
- These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Expression System:

- ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require posttranslational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
 protein production are removed, leaving only the protein production machinery and the
 mitochondria to drive the reaction. During our lysate completion steps, the additional
 components needed for protein production (amino acids, cofactors, etc.) are added to
 produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured against its specific reference buffer.
- We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.

Purification:

One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression

| | System (AliCE®). | |
| Purity: | > 70-80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC). | |
| Grade: | custom-made | |
| Target Details | | |
| Target: | EFR3B | |
| Alternative Name: | EFR3B (EFR3B Products) | |
| Background: | Protein EFR3 homolog B,FUNCTION: Component of a complex required to localize | |
| | phosphatidylinositol 4-kinase (PI4K) to the plasma membrane (PubMed:23229899, | |
| | PubMed:25608530, PubMed:26571211). The complex acts as a regulator of | |
| | phosphatidylinositol 4-phosphate (PtdIns(4)P) synthesis (Probable). In the complex, EFR3B | |
| | probably acts as the membrane-anchoring component (PubMed:23229899). Also involved in | |
| | responsiveness to G-protein-coupled receptors, it is however unclear whether this role is direct | |
| | or indirect (PubMed:25380825). {ECO:0000269 PubMed:23229899, | |
| | ECO:0000269 PubMed:25380825, ECO:0000269 PubMed:25608530, | |

| | needed is the DNA that codes for the desired protein! |
| Restrictions: | For Research Use only |
| Handling | |
| Format: | Liquid |
| Buffer: | The buffer composition is at the discretion of the manufacturer. Standard Storage Buffer: PBS pH 7.4, 10 % Glycerol Might differ depending on protein. |
| Handling Advice: | Avoid repeated freeze-thaw cycles. |
| Storage: | -80 °C |
| Storage Comment: | Store at -80°C. |
| Expiry Date: | 12 months |
