antibodies

Datasheet for ABIN3092582 FBX09 Protein (AA 1-447) (Strep Tag)

Overview

Quantity:	1 mg
Target:	FBX09
Protein Characteristics:	AA 1-447
Origin:	Human
Source:	Tobacco (Nicotiana tabacum)
Protein Type:	Recombinant
Purification tag / Conjugate:	This FBX09 protein is labelled with Strep Tag.
Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS)

Product Details

Sequence:	MPDIIWVFPP QAEAEEDCHS DTVRADDDEE NESPAETDLQ AQLQMFRAQW MFELAPGVSS
	SNLENRPCRA ARGSLQKTSA DTKGKQEQAK EEKARELFLK AVEEEQNGAL YEAIKFYRRA
	MQLVPDIEFK ITYTRSPDGD GVGNSYIEDN DDDSKMADLL SYFQQQLTFQ ESVLKLCQPE
	LESSQIHISV LPMEVLMYIF RWVVSSDLDL RSLEQLSLVC RGFYICARDP EIWRLACLKV
	WGRSCIKLVP YTSWREMFLE RPRVRFDGVY ISKTTYIRQG EQSLDGFYRA WHQVEYYRYI
	RFFPDGHVMM LTTPEEPQSI VPRLRTRNTR TDAILLGHYR LSQDTDNQTK VFAVITKKKE
	EKPLDYKYRY FRRVPVQEAD QSFHVGLQLC SSGHQRFNKL IWIHHSCHIT YKSTGETAVS
	AFEIDKMYTP LFFARVRSYT AFSERPL
	Sequence without tag. The proposed Strep-Tag is based on experience s with the expression
	system, a different complexity of the protein could make another tag necessary. In case you
	have a special request, please contact us.
Characteristics:	Key Benefits:

- · Made in Germany from design to production by highly experienced protein experts.
- Protein expressed with ALICE® and purified by multi-step, protein-specific process to ensure correct folding and modification.
- These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein.

The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

Expression System:

- ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require posttranslational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
 protein production are removed, leaving only the protein production machinery and the
 mitochondria to drive the reaction. During our lysate completion steps, the additional
 components needed for protein production (amino acids, cofactors, etc.) are added to
 produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer.
- We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.

Purification:

Two step purification of proteins expressed in Almost Living Cell-Free Expression System (ALiCE®):

- 1. In a first purification step, the protein is purified from the cleared cell lysate using StrepTag capture material. Eluate fractions are analyzed by SDS-PAGE.
- Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.

Product Details	
Purity:	>80 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Endotoxin Level:	Low Endotoxin less than 1 EU/mg (< 0.1 ng/mg)
Grade:	Crystallography grade
Target Details	
Target:	FBX09
Alternative Name:	FBX09 (FBX09 Products)
Background:	F-box only protein 9 (Cross-immune reaction antigen 1) (Renal carcinoma antigen NY-REN- 57),FUNCTION: Substrate recognition component of a SCF (SKP1-CUL1-F-box protein) E3
	ubiquitin-protein ligase complex which mediates the ubiquitination and subsequent
	proteasomal degradation of target proteins and plays a role in several biological processes
	such as cell cycle, cell proliferation, or maintenance of chromosome stability
	(PubMed:34480022, PubMed:23263282). Ubiquitinates mTORC1-bound TTI1 and TELO2 when
	they are phosphorylated by CK2 following growth factor deprivation, leading to their
	degradation. In contrast, does not mediate ubiquitination of TTI1 and TELO2 when they are part
	of the mTORC2 complex. As a consequence, mTORC1 is inactivated to restrain cell growth and
	protein translation, while mTORC2 is the activated due to the relief of feedback inhibition by
	mTORC1 (PubMed:23263282). Plays a role in maintaining epithelial cell survival by regulating
	the turn-over of chromatin modulator PRMT4 through ubiquitination and degradation by the
	proteasomal pathway (PubMed:34480022). Regulates also PPARgamma stability by facilitating
	PPARgamma/PPARG ubiquitination and thereby plays a role in adipocyte differentiation (By
	similarity). {ECO:0000250 UniProtKB:Q8BK06, ECO:0000269 PubMed:23263282,
	EC0:0000269 PubMed:34480022}.
Molecular Weight:	52.3 kDa
UniProt:	Q9UK97
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a
	guarantee though.
Comment:	ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from
	Nicotiana tabacum c.v This contains all the protein expression machinery needed to produce

	even the most difficult-to-express proteins, including those that require post-translational
	modifications.
	During lysate production, the cell wall and other cellular components that are not required for
	protein production are removed, leaving only the protein production machinery and the
	mitochondria to drive the reaction. During our lysate completion steps, the additional
	components needed for protein production (amino acids, cofactors, etc.) are added to produce
	something that functions like a cell, but without the constraints of a living system - all that's
	needed is the DNA that codes for the desired protein!
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer. If you have a special request,
	please contact us.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
