## Datasheet for ABIN3092661 FSTL3 Protein (AA 27-263) (His tag)

Image

## Overview

Quantity:	1 mg
Target:	FSTL3
Protein Characteristics:	AA 27-263
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This FSTL3 protein is labelled with His tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys)

## Product Details

Sequence:	MGSGNPAPGG VCWLQQGQEA TCSLVLQTDV TRAECCASGN IDTAWSNLTH PGNKINLLGF
	LGLVHCLPCK DSCDGVECGP GKACRMLGGR PRCECAPDCS GLPARLQVCG SDGATYRDEC
	ELRAARCRGH PDLSVMYRGR CRKSCEHVVC PRPQSCVVDQ TGSAHCVVCR AAPCPVPSSP
	GQELCGNNNV TYISSCHMRQ ATCFLGRSIG VRHAGSCAGT PEEPPGGESA EEEENFV
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.

	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	<ol> <li>In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE.</li> </ol>
	<ol> <li>Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.</li> </ol>
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade
Target Details	
Target:	FSTL3
Alternative Name:	FSTL3 (FSTL3 Products)
Background:	Isoform 1 or the secreted form is a binding and antagonizing protein for members of the TGF-

beta family, such us activin, BMP2 and MSTN. Inhibits activin A-, activin B-, BMP2- and MSDT-

induced cellular signaling, more effective on activin A than on activin B. Involved in bone

## Target Details

	formation, inhibits osteoclast differentiationc. Involved in hematopoiesis, involved in differentiation of hemopoietic progenitor cells, increases hematopoietic cell adhesion to fibronectin and seems to contribute to the adhesion of hematopoietic precursor cells to the bone marrow stroma. Isoform 2 or the nuclear form is probably involved in transcriptional regulation via interaction with MLLT10. {ECO:0000269 PubMed:11948405, ECO:0000269 PubMed:15451575, ECO:0000269 PubMed:15574124, ECO:0000269 PubMed:16336961, ECO:0000269 PubMed:17868029, ECO:0000269 PubMed:17878677}.
Molecular Weight:	25.9 kDa Including tag.
UniProt:	095633
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
