## Datasheet for ABIN3092688 FLT3 Protein (AA 27-543) (His tag)

Image

## Overview

| Quantity:                     | 1 mg                                                                 |
|-------------------------------|----------------------------------------------------------------------|
| Target:                       | FLT3                                                                 |
| Protein Characteristics:      | AA 27-543                                                            |
| Origin:                       | Human                                                                |
| Source:                       | Insect Cells                                                         |
| Protein Type:                 | Recombinant                                                          |
| Purification tag / Conjugate: | This FLT3 protein is labelled with His tag.                          |
| Application:                  | SDS-PAGE (SDS), Western Blotting (WB), ELISA, Crystallization (Crys) |

|                  | This protein is a made to order protein and will be made for the first time for your order. Our                                                                                                                                                                                                                               |
|                  | experts in the lab will ensure that you receive a correctly folded protein.                                                                                                                                                                                                                                                   |
|                  | The big advantage of ordering our made-to-order proteins in comparison to ordering custom                                                                                                                                                                                                                                     |
|                  | made proteins from other companies is that there is no financial obligation in case the protein                                                                                                                                                                                                                               |
|                  | cannot be expressed or purified.                                                                                                                                                                                                                                                                                              |
|                  | In the unlikely event that the protein cannot be expressed or purified we do not charge anything                                                                                                                                                                                                                              |
|                  | (other companies might charge you for any performed steps in the expression process for                                                                                                                                                                                                                                       |
|                  | custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression                                                                                                                                                                                                                                  |
|                  | experiments or purification optimization).                                                                                                                                                                                                                                                                                    |
|                  | When you order this made-to-order protein you will only pay upon receival of the correctly                                                                                                                                                                                                                                    |
|                  | folded protein. With no financial risk on your end you can rest assured that our experienced                                                                                                                                                                                                                                  |
|                  | protein experts will do everything to make sure that you receive the protein you ordered.                                                                                                                                                                                                                                     |
|                  | The concentration of our recombinant proteins is measured using the absorbance at 280nm.                                                                                                                                                                                                                                      |
|                  | The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer.                                                                                                                                                                                                         |
|                  | The concentration of the protein is calculated using its specific absorption coefficient. We use                                                                                                                                                                                                                              |
|                  | the Expasy's protparam tool to determine the absorption coefficient of each protein.                                                                                                                                                                                                                                          |
| Purification:    | Two step purification of proteins expressed in baculovirus infected SF9 insect cells:                                                                                                                                                                                                                                         |
|                  | <ol> <li>In a first purification step, the protein is purified from the cleared cell lysate using three<br/>different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate<br/>fractions are analyzed by SDS-PAGE.</li> </ol>                                                                      |
|                  | <ol> <li>Protein containing fractions of the best purification are subjected to second purification step<br/>through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and<br/>Western blot.</li> </ol>                                                                                                |
| Purity:          | >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.                                                                                                                                                                                                                                              |
| Sterility:       | 0.22 µm filtered                                                                                                                                                                                                                                                                                                              |
| Endotoxin Level: | Protein is endotoxin free.                                                                                                                                                                                                                                                                                                    |
| Grade:           | Crystallography grade                                                                                                                                                                                                                                                                                                         |
|                  |                                                                                                                                                                                                                                                                                                                               |

| Target Details      |                                                                                                                                                                                                        |
|---------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Target:             | FLT3                                                                                                                                                                                                   |
| Alternative Name:   | FLT3 (FLT3 Products)                                                                                                                                                                                   |
| Background:         | Tyrosine-protein kinase that acts as cell-surface receptor for the cytokine FLT3LG and regulates differentiation, proliferation and survival of hematopoietic progenitor cells and of dendritic cells. |
|                     | Promotes phosphorylation of SHC1 and AKT1, and activation of the downstream effector                                                                                                                   |
|                     | MTOR. Promotes activation of RAS signaling and phosphorylation of downstream kinases,                                                                                                                  |
|                     | including MAPK1/ERK2 and/or MAPK3/ERK1. Promotes phosphorylation of FES, FER,                                                                                                                          |
|                     | PTPN6/SHP, PTPN11/SHP-2, PLCG1, and STAT5A and/or STAT5B. Activation of wild-type FLT3                                                                                                                 |
|                     | causes only marginal activation of STAT5A or STAT5B. Mutations that cause constitutive                                                                                                                 |
|                     | kinase activity promote cell proliferation and resistance to apoptosis via the activation of                                                                                                           |
|                     | multiple signaling pathways. {ECO:0000269 PubMed:10080542,                                                                                                                                             |

| Molecular Weight:   | 59.3 kDa Including tag.                                                                                                                                                                                |
| UniProt:            | P36888                                                                                                                                                                                                 |
| Pathways:           | RTK Signaling                                                                                                                                                                                          |
| Application Details |                                                                                                                                                                                                        |
| Application Notes:  | In addition to the applications listed above we expect the protein to work for functional studies                                                                                                      |
|                     | as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee                                                                                                      |
|                     | though.                                                                                                                                                                                                |
| Comment:            | In cases in which it is highly likely that the recombinant protein with the default tag will be                                                                                                        |
|                     | insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to                                                                                                          |
|                     | increase solubility. We will discuss all possible options with you in detail to assure that you                                                                                                        |
|                     | receive your protein of interest.                                                                                                                                                                      |
| Restrictions:       | For Research Use only                                                                                                                                                                                  |
| Handling            |                                                                                                                                                                                                        |
| Format:             | Liquid                                                                                                                                                                                                 |
