## Datasheet for ABIN3092756 GDF6 Protein (AA 336-455) (His tag)

Image

Overview

000101000	
Quantity:	1 mg
Target:	GDF6
Protein Characteristics:	AA 336-455
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This GDF6 protein is labelled with His tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys)
Product Details	
Sequence:	TAFASRHGKR HGKKSRLRCS KKPLHVNFKE LGWDDWIIAP LEYEAYHCEG VCDFPLRSHL
	EPTNHAIIQT LMNSMDPGST PPSCCVPTKL TPISILYIDA GNNVVYKQYE DMVVESCGCR
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	Made in Germany - from design to production - by highly experienced protein experts.
	Human GDF6 Protein (raised in Insect Cells) purified by multi-step, protein-specific process
	to ensure crystallization grade.
	State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.
	experts in the lab will ensure that you receive a correctly folded protein. The big advantage of ordering our made-to-order proteins in comparison to ordering custom

All rights reserved.

Product Details	
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	<ol> <li>In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE.</li> </ol>
	<ol> <li>Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.</li> </ol>
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade

## Target Details

Target:	GDF6
Alternative Name:	GDF6 (GDF6 Products)
Background:	Growth factor that controls proliferation and cellular differentiation in the retina and bone
	formation. Plays a key role in regulating apoptosis during retinal development. Establishes
	dorsal-ventral positional information in the retina and controls the formation of the retinotectal
	map (PubMed:23307924). Required for normal formation of bones and joints in the limbs, skull,
	digits and axial skeleton. Plays a key role in establishing boundaries between skeletal elements

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 2/4 | Product datasheet for ABIN3092756 | 09/11/2023 | Copyright antibodies-online. 	during development. Regulation of GDF6 expression seems to be a mechanism for evolving
	species-specific changes in skeletal strucutres. Seems to positively regulates differentiation of
	chondrogenic tissue through the growth factor receptors subunits BMPR1A, BMPR1B, BMPR2
	and ACVR2A, leading to the activation of SMAD1-SMAD5-SMAD8 complex. The regulation of
	chondrogenic differentiation is inhibited by NOG (PubMed:26643732). Also involved in the
	induction of adipogenesis from mesenchymal stem cells. This mechanism acts through the
	growth factor receptors subunits BMPR1A, BMPR2 and ACVR2A and the activation of SMAD1-
	SMAD5-SMAD8 complex and MAPK14/p38 (By similarity). {EC0:0000250 UniProtKB:P43028,
	EC0:0000269 PubMed:23307924, EC0:0000269 PubMed:26643732}.
Molecular Weight:	14.5 kDa Including tag.
UniProt:	Q6KF10
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee
	though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be
	insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to
	increase solubility. We will discuss all possible options with you in detail to assure that you
	receive your protein of interest.
Restrictions:	For Research Use only

## Handling

Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)

**Image 1.** "Crystallography Grade" protein due to multi-step, protein-specific purification process
