## Datasheet for ABIN3092871 GRIA4 Protein (AA 22-544) (His tag)

Overview

Quantity:	1 mg
Target:	GRIA4
Protein Characteristics:	AA 22-544
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This GRIA4 protein is labelled with His tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys)

## Product Details

Sequence:	AFPSSVQIGG LFIRNTDQEY TAFRLAIFLH NTSPNASEAP FNLVPHVDNI ETANSFAVTN
	AFCSQYSRGV FAIFGLYDKR SVHTLTSFCS ALHISLITPS FPTEGESQFV LQLRPSLRGA
	LLSLLDHYEW NCFVFLYDTD RGYSILQAIM EKAGQNGWHV SAICVENFND VSYRQLLEEL
	DRRQEKKFVI DCEIERLQNI LEQIVSVGKH VKGYHYIIAN LGFKDISLER FIHGGANVTG
	FQLVDFNTPM VIKLMDRWKK LDQREYPGSE TPPKYTSALT YDGVLVMAET FRSLRRQKID
	ISRRGNAGDC LANPAAPWGQ GIDMERTLKQ VRIQGLTGNV QFDHYGRRVN YTMDVFELKS
	TGPRKVGYWN DMDKLVLIQD VPTLGNDTAA IENRTVVVTT IMESPYVMYK KNHEMFEGND
	KYEGYCVDLA SEIAKHIGIK YKIAIVPDGK YGARDADTKI WNGMVGELVY GKAEIAIAPL
	TITLVREEVI DFSKPFMSLG ISIMIKKPQK SKPGVFSFLD PLA
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.

Product Details	
Characteristics:	<ul> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> <li>Human GRIA4 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade.</li> <li>State-of-the-art algorithm used for plasmid design (Gene synthesis).</li> </ul>
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	<ol> <li>In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE.</li> </ol>
	<ol> <li>Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.</li> </ol>
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade

## Target Details

Target:	GRIA4
Alternative Name:	GRIA4 (GRIA4 Products)
Background:	Receptor for glutamate that functions as ligand-gated ion channel in the central nervous
	system and plays an important role in excitatory synaptic transmission. L-glutamate acts as an
	excitatory neurotransmitter at many synapses in the central nervous system. Binding of the
	excitatory neurotransmitter L-glutamate induces a conformation change, leading to the opening
	of the cation channel, and thereby converts the chemical signal to an electrical impulse. The
	receptor then desensitizes rapidly and enters a transient inactive state, characterized by the
	presence of bound agonist. In the presence of CACNG4 or CACNG7 or CACNG8, shows
	resensitization which is characterized by a delayed accumulation of current flux upon continued
	application of glutamate. {ECO:0000269 PubMed:21172611}.
Molecular Weight:	60.0 kDa Including tag.
UniProt:	P48058
Pathways:	PI3K-Akt Signaling
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee
	though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be
	insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to
	increase solubility. We will discuss all possible options with you in detail to assure that you
	receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Buffer: Handling Advice:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer. Avoid repeated freeze-thaw cycles.
