antibodies

Datasheet for ABIN3092945 HNRNPD/AUF1 Protein (AA 2-355) (His tag)

Overview

Quantity:	1 mg
Target:	HNRNPD/AUF1 (HNRNPD)
Protein Characteristics:	AA 2-355
Origin:	Human
Source:	Escherichia coli (E. coli)
Protein Type:	Recombinant
Purification tag / Conjugate:	This HNRNPD/AUF1 protein is labelled with His tag.
Application:	SDS-PAGE (SDS), ELISA, Western Blotting (WB), Crystallization (Crys)

Product Details

Sequence:	SEEQFGGDGA AAAATAAVGG SAGEQEGAMV AATQGAAAAA GSGAGTGGGT ASGGTEGGSA		
	ESEGAKIDAS KNEEDEGHSN SSPRHSEAAT AQREEWKMFI GGLSWDTTKK DLKDYFSKFG		
	EVVDCTLKLD PITGRSRGFG FVLFKESESV DKVMDQKEHK LNGKVIDPKR AKAMKTKEPV		
	KKIFVGGLSP DTPEEKIREY FGGFGEVESI ELPMDNKTNK RRGFCFITFK EEEPVKKIME		
	KKYHNVGLSK CEIKVAMSKE QYQQQQQWGS RGGFAGRARG RGGGPSQNWN QGYSNYWNQG		
	YGNYGYNSQG YGGYGGYDYT GYNNYYGYGD YSNQQSGYGK VSRRGGHQNS YKPY		
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a		
	special request, please contact us.		
Characteristics:	Made in Germany - from design to production - by highly experienced protein experts.		
	Human HNRNPD Protein (raised in E. Coli) purified by multi-step, protein-specific process to		
	ensure crystallization grade.		
	State-of-the-art algorithm used for plasmid design (Gene synthesis).

Product Details		
	This protein is a made to order protein and will be made for the first time for your order. Our	
	experts in the lab will ensure that you receive a correctly folded protein.	
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom	
	made proteins from other companies is that there is no financial obligation in case the protein	
	cannot be expressed or purified.	
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything	
	(other companies might charge you for any performed steps in the expression process for	
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression	
	experiments or purification optimization).	
	When you order this made-to-order protein you will only pay upon receival of the correctly	
	folded protein. With no financial risk on your end you can rest assured that our experienced	
	protein experts will do everything to make sure that you receive the protein you ordered.	
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.	
	The protein's absorbance will be measured in several dilutions and is measured against its	
	specific reference buffer.	
	The concentration of the protein is calculated using its specific absorption coefficient. We use	
	the Expasy's protparam tool to determine the absorption coefficient of each protein.	
Purification:	Two step purification of proteins expressed in bacterial culture:	
	1. In a first purification step, the protein is purified from the cleared cell lysate using three	
	different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate	
	fractions are analyzed by SDS-PAGE. 2. Protein containing fractions of the best purification are subjected to second purification step	
	through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and	
	Western blot.	
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.	
Sterility:	0.22 µm filtered	
Endotoxin Level:	Endotoxin has not been removed. Please contact us if you require endotoxin removal.	
Grade:	Crystallography grade	
T . D		
Target Details		
Target:	HNRNPD/AUF1 (HNRNPD)	
Alternative Name:	HNRNPD (HNRNPD Products)	

Background: Binds with high affinity to RNA molecules that contain AU-rich elements (AREs) found within

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 2/4 | Product datasheet for ABIN3092945 | 09/11/2023 | Copyright antibodies-online. 	the 3'-UTR of many proto-oncogenes and cytokine mRNAs. Also binds to double- and single-		
	stranded DNA sequences in a specific manner and functions a transcription factor. Each of the		
	RNA-binding domains specifically can bind solely to a single-stranded non-monotonous 5'-		
	UUAG-3' sequence and also weaker to the single-stranded 5'-TTAGGG-3' telomeric DNA repeat.		
	Binds RNA oligonucleotides with 5'-UUAGGG-3' repeats more tightly than the telomeric single-		
	stranded DNA 5'-TTAGGG-3' repeats. Binding of RRM1 to DNA inhibits the formation of DNA		
	quadruplex structure which may play a role in telomere elongation. May be involved in		
	translationally coupled mRNA turnover. Implicated with other RNA-binding proteins in the		
	cytoplasmic deadenylation/translational and decay interplay of the FOS mRNA mediated by the		
	major coding-region determinant of instability (mCRD) domain. May play a role in the regulation		
	of the rhythmic expression of circadian clock core genes. Directly binds to the 3'UTR of CRY1		
	mRNA and induces CRY1 rhythmic translation. May also be involved in the regulation of PER2		
	translation. {ECO:0000269 PubMed:10080887, ECO:0000269 PubMed:11051545,		
	ECO:0000269 PubMed:24423872}.		
Molecular Weight:	39.3 kDa Including tag.		
UniProt:	Q14103		
Application Details			
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies		
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee		
	though.		
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be		
	insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to		
	increase solubility. We will discuss all possible options with you in detail to assure that you		
	receive your protein of interest.		
Restrictions:	For Research Use only		
Handling			
Format:	Liquid		
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.		
Handling Advice:	Avoid repeated freeze-thaw cycles.		
Storage:	-80 °C
