

Datasheet for ABIN3092972 HNRNPC Protein (AA 2-306) (His tag)

Overview

| Quantity: | 1 mg |
|-------------------------------|--|
| Target: | HNRNPC |
| Protein Characteristics: | AA 2-306 |
| Origin: | Human |
| Source: | Escherichia coli (E. coli) |
| Protein Type: | Recombinant |
| Purification tag / Conjugate: | This HNRNPC protein is labelled with His tag. |
| Application: | ELISA, SDS-PAGE (SDS), Western Blotting (WB), Crystallization (Crys) |
| Product Details | |
| Sequence: | |
| dequence: | ASNVTNKTDP RSMNSRVFIG NLNTLVVKKS DVEAIFSKYG KIVGCSVHKG FAFVQYVNER |

| | This protein is a made to order protein and will be made for the first time for your order. Our |
|------------------|---|
| | experts in the lab will ensure that you receive a correctly folded protein. |
| | The big advantage of ordering our made-to-order proteins in comparison to ordering custom |
| | made proteins from other companies is that there is no financial obligation in case the protein |
| | cannot be expressed or purified. |
| | In the unlikely event that the protein cannot be expressed or purified we do not charge anything |
| | (other companies might charge you for any performed steps in the expression process for |
| | custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression |
| | experiments or purification optimization). |
| | When you order this made-to-order protein you will only pay upon receival of the correctly |
| | folded protein. With no financial risk on your end you can rest assured that our experienced |
| | protein experts will do everything to make sure that you receive the protein you ordered. |
| | The concentration of our recombinant proteins is measured using the absorbance at 280nm. |
| | The protein's absorbance will be measured in several dilutions and is measured against its |
| | specific reference buffer. |
| | The concentration of the protein is calculated using its specific absorption coefficient. We use |
| | the Expasy's protparam tool to determine the absorption coefficient of each protein. |
| Purification: | Two step purification of proteins expressed in bacterial culture: |
| | 1. In a first purification step, the protein is purified from the cleared cell lysate using three |
| | different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate |
| | fractions are analyzed by SDS-PAGE. 2. Protein containing fractions of the best purification are subjected to second purification step |
| | through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and |
| | Western blot. |
| Purity: | >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot. |
| Sterility: | 0.22 µm filtered |
| Endotoxin Level: | Endotoxin has not been removed. Please contact us if you require endotoxin removal. |
| Grade: | Crystallography grade |
| | |
| Target Details | |
| Target: | HNRNPC |

Product Details

| Target: | HNRNPC |
|-------------------|--|
| Alternative Name: | HNRNPC (HNRNPC Products) |
| Background: | Binds pre-mRNA and nucleates the assembly of 40S hnRNP particles (PubMed:8264621). |

| | Specifically recognizes and binds N6-methyladenosine (m6A)-containing RNAs, a modification |
|---------------------|---|
| | present at internal sites of mRNAs that affects mRNA splicing, processing and stability. M6A |
| | alters the local structure in mRNAs and long non-coding RNAs (IncRNAs) via a mechanism |
| | named 'm(6)A-switch' to facilitate binding of HNRNPC, leading to regulation of mRNA splicing |
| | (PubMed:25719671). Single HNRNPC tetramers bind 230-240 nucleotides. Trimers of HNRNPC |
| | tetramers bind 700 nucleotides. May play a role in the early steps of spliceosome assembly and |
| | pre-mRNA splicing. Interacts with poly-U tracts in the 3'-UTR or 5'-UTR of mRNA and modulates |
| | the stability and the level of translation of bound mRNA molecules (PubMed:12509468, |
| | PubMed:16010978, PubMed:7567451, PubMed:8264621). {ECO:0000269 PubMed:12509468, |
| | EC0:0000269 PubMed:16010978, EC0:0000269 PubMed:25719671, |
| | ECO:0000269 PubMed:7567451, ECO:0000269 PubMed:8264621}. |
| Molecular Weight: | 34.5 kDa Including tag. |
| UniProt: | P07910 |
| Application Details | |
| Application Notes: | In addition to the applications listed above we expect the protein to work for functional studies |
| | as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though. |
| Comment: | In cases in which it is highly likely that the recombinant protein with the default tag will be |
| | insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to |
| | increase solubility. We will discuss all possible options with you in detail to assure that you |
| | receive your protein of interest. |
| Restrictions: | For Research Use only |
| Handling | |
| Format: | Liquid |
| Buffer: | 100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer. |
| Handling Advice: | Avoid repeated freeze-thaw cycles. |
| Storage: | -80 °C |
| Storage Comment: | Store at -80°C. |
| Expiry Date: | Unlimited (if stored properly) |
