## Datasheet for ABIN3093153 KPNA2 Protein (AA 2-529) (His tag)

Image

## Overview

Quantity:	1 mg
Target:	KPNA2
Protein Characteristics:	AA 2-529
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This KPNA2 protein is labelled with His tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys)

## Product Details

Sequence:	STNENANTPA ARLHRFKNKG KDSTEMRRRR IEVNVELRKA KKDDQMLKRR NVSSFPDDAT
	SPLQENRNNQ GTVNWSVDDI VKGINSSNVE NQLQATQAAR KLLSREKQPP IDNIIRAGLI
	PKFVSFLGRT DCSPIQFESA WALTNIASGT SEQTKAVVDG GAIPAFISLL ASPHAHISEQ
	AVWALGNIAG DGSVFRDLVI KYGAVDPLLA LLAVPDMSSL ACGYLRNLTW TLSNLCRNKN
	PAPPIDAVEQ ILPTLVRLLH HDDPEVLADT CWAISYLTDG PNERIGMVVK TGVVPQLVKL
	LGASELPIVT PALRAIGNIV TGTDEQTQVV IDAGALAVFP SLLTNPKTNI QKEATWTMSN
	ITAGRQDQIQ QVVNHGLVPF LVSVLSKADF KTQKEAVWAV TNYTSGGTVE QIVYLVHCGI
	IEPLMNLLTA KDTKIILVIL DAISNIFQAA EKLGETEKLS IMIEECGGLD KIEALQNHEN ESVYKASLSL
	IEKYFSVEEE EDQNVVPETT SEGYTFQVQD GAPGTFNF
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.

Product Details	
Characteristics:	<ul> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> <li>Human KPNA2 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade.</li> <li>State-of-the-art algorithm used for plasmid design (Gene synthesis).</li> </ul>
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	<ol> <li>In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE.</li> </ol>
	<ol> <li>Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.</li> </ol>
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade

## Target Details

Target:	KPNA2		
Alternative Name:	KPNA2 (KPNA2 Products)		
Background:	Functions in nuclear protein import as an adapter protein for nuclear receptor KPNB1. Binds		
	specifically and directly to substrates containing either a simple or bipartite NLS motif. Docking		
	of the importin/substrate complex to the nuclear pore complex (NPC) is mediated by KPNB1		
	through binding to nucleoporin FxFG repeats and the complex is subsequently translocated		
	through the pore by an energy requiring, Ran-dependent mechanism. At the nucleoplasmic side		
	of the NPC, Ran binds to importin-beta and the three components separate and importin-alpha		
	and -beta are re-exported from the nucleus to the cytoplasm where GTP hydrolysis releases		
	Ran from importin. The directionality of nuclear import is thought to be conferred by an		
	asymmetric distribution of the GTP- and GDP-bound forms of Ran between the cytoplasm and		
	nucleus.		
Molecular Weight:	58.7 kDa Including tag.		
UniProt:	P52292		
Pathways:	M Phase, Protein targeting to Nucleus		
Application Details			
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies		
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee		
	though.		
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be		
	insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to		
	increase solubility. We will discuss all possible options with you in detail to assure that you		
	receive your protein of interest.		
Restrictions:	For Research Use only		
Handling			
Format:	Liquid		
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.		
Handling Advice:	Avoid repeated freeze-thaw cycles.		
Storage:	-80 °C
