Datasheet for ABIN3093255 Kv1.4 Protein (AA 1-304) (His tag)

Image

Overview

Quantity:	1 mg
Target:	Kv1.4 (KCNA4)
Protein Characteristics:	AA 1-304
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This Kv1.4 protein is labelled with His tag.
Application:	ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS)
Product Details	
Sequence:	MEVAMVSAES SGCNSHMPYG YAAQARARER ERLAHSRAAA AAAVAAATAA VEGSGGSGGG
	SHHHHQSRGA CTSHDPQSSR GSRRRRRQRS EKKKAHYRQS SFPHCSDLMP SGSEEKILRE
	LSEEEEDEEE EEEEEEGRF YYSEDDHGDE CSYTDLLPQD EGGGGYSSVR YSDCCERVVI
	NVSGLRFETQ MKTLAQFPET LLGDPEKRTQ YFDPLRNEYF FDRNRPSFDA ILYYYQSGGR
	LKRPVNVPFD IFTEEVKFYQ LGEEALLKFR EDEGFVREEE DRALPENEFK KQIWLLFEYP ESSS
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	 Made in Germany - from design to production - by highly experienced protein experts. Human KCNA4 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade. State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made to order protein and will be made for the first time for your order. Our

	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anythin
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three
	different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
	fractions are analyzed by SDS-PAGE. 2. Protein containing fractions of the best purification are subjected to second purification ste
	through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and
	Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade
Target Details	
Target:	Kv1.4 (KCNA4)
-	

Target:	Kv1.4 (KCNA4)
Alternative Name:	KCNA4 (KCNA4 Products)
Background:	Voltage-gated potassium channel that mediates transmembrane potassium transport in excitable membranes. Forms tetrameric potassium-selective channels through which

	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
Application Details	
UniProt:	P22459
Molecular Weight:	35.7 kDa Including tag.
	ECO:0000269 PubMed:8495559}.
	(PubMed:17156368). {ECO:0000269 PubMed:17156368, ECO:0000269 PubMed:19912772,
	heterotetrameric channel formed by KCNA1 and KCNA4 shows rapid inactivation
	rapid spontaneous channel closure (PubMed:19912772, PubMed:8495559). Likewise, a
	forms a potassium channel that opens in response to membrane depolarization, followed by
	intact tissues to any particular potassium channel family member. Homotetrameric KCNA4
	heteromeric potassium channel complexes, making it difficult to assign currents observed in
	subunits and promote rapid inactivation. In vivo, membranes probably contain a mixture of
	modulated by cytoplasmic beta subunits that regulate the subcellular location of the alpha
	type of alpha subunits that are part of the channel (PubMed:8495559). Channel properties are
	KCNA4, KCNA5, and possibly other family members as well, channel properties depend on the
	channels and heterotetrameric channels that contain variable proportions of KCNA1, KCNA2,
	membrane (PubMed:19912772, PubMed:8495559). Can form functional homotetrameric
	between opened and closed conformations in response to the voltage difference across the

Handling Advice: Avoid repeated freeze-thaw cycles.

Buffer:
