Datasheet for ABIN3093550 LIN28A Protein (AA 2-209) (His tag)

Overview

Overview	
Quantity:	1 mg
Target:	LIN28A
Protein Characteristics:	AA 2-209
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This LIN28A protein is labelled with His tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys)
Product Details	
Sequence:	GSVSNQQFAG GCAKAAEEAP EEAPEDAARA ADEPQLLHGA GICKWFNVRM GFGFLSMTAR
	AGVALDPPVD VFVHQSKLHM EGFRSLKEGE AVEFTFKKSA KGLESIRVTG PGGVFCIGSE
	RRPKGKSMQK RRSKGDRCYN CGGLDHHAKE CKLPPQPKKC HFCQSISHMV ASCPLKAQQG
	PSAQGKPTYF REEEEEIHSP TLLPEAQN
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	 Made in Germany - from design to production - by highly experienced protein experts. Human LIN28A Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade. State of the art elegarithm used for pleamid design (Cane synthesis)
	State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.

	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three
	different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
	fractions are analyzed by SDS-PAGE. 2. Protein containing fractions of the best purification are subjected to second purification step
	through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and
	Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade
Target Details	
Target:	LIN28A
Alternative Name:	LIN28A (LIN28A Products)

Background:	'Translational enhancer' that drives specific mRNAs to polysomes and increases the efficiency
	of protein synthesis. Its association with the translational machinery and target mRNAs results
	in an increased number of initiation events per molecule of mRNA and, indirectly, in mRNA

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 2/4 | Product datasheet for ABIN3093550 | 04/30/2024 | Copyright antibodies-online. Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Format:	Liquid
Handling	
Restrictions:	For Research Use only
	increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Application Details	
Pathways:	Stem Cell Maintenance
UniProt:	Q9H9Z2
Molecular Weight:	23.6 kDa Including tag.
	ECO:0000269 PubMed:22118463, ECO:0000269 PubMed:22898984}.
	ECO:0000269 PubMed:18951094, ECO:0000269 PubMed:19703396,
	preventing let-7-mediated differentiation of embryonic stem cells (By similarity). {ECO:0000250,
	fail to be processed by Dicer and undergo degradation. The repression of let-7 expression is required for normal development and contributes to maintain the pluripotent state by
	miRNAs (PubMed:19703396) (PubMed:22118463) (PubMed:22898984). Uridylated pre-miRNAs
	ZCCHC11/TUT4 uridylyltransferase. This results in the terminal uridylation of target pre-
	(pre-miRNAs), recognizing an 5'-GGAG-3' motif found in pre-miRNA terminal loop, and recruits
	including that of let-7, miR107, miR-143 and miR-200c. Specifically binds miRNA precursors
	regulation of IGF2 expression (By similarity). Suppressor of microRNA (miRNA) biogenesis,
	own mRNA. Essential for skeletal muscle differentiation program through the translational up-

Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
