antibodies

# Datasheet for ABIN3093772 MERTK Protein (AA 21-505) (His tag)

I Image

#### Overview

Quantity:	1 mg
Target:	MERTK
Protein Characteristics:	AA 21-505
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This MERTK protein is labelled with His tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys)

#### Product Details

Sequence:	AITEAREEAK PYPLFPGPFP GSLQTDHTPL LSLPHASGYQ PALMFSPTQP GRPHTGNVAI	
	PQVTSVESKP LPPLAFKHTV GHIILSEHKG VKFNCSISVP NIYQDTTISW WKDGKELLGA	
	HHAITQFYPD DEVTAIIASF SITSVQRSDN GSYICKMKIN NEEIVSDPIY IEVQGLPHFT	
	KQPESMNVTR NTAFNLTCQA VGPPEPVNIF WVQNSSRVNE QPEKSPSVLT VPGLTEMAVF	
	SCEAHNDKGL TVSKGVQINI KAIPSPPTEV SIRNSTAHSI LISWVPGFDG YSPFRNCSIQ	
	VKEADPLSNG SVMIFNTSAL PHLYQIKQLQ ALANYSIGVS CMNEIGWSAV SPWILASTTE	
	GAPSVAPLNV TVFLNESSDN VDIRWMKPPT KQQDGELVGY RISHVWQSAG ISKELLEEVG	
	QNGSRARISV QVHNATCTVR IAAVTRGGVG PFSDPVKIFI PAHGWVDYAP SSTPAPGNAD PVLII	
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a	
	special request, please contact us.	
Characteristics:	Made in Germany - from design to production - by highly experienced protein experts.	
	Human MERTK Protein (raised in Insect Cells) purified by multi-step, protein-specific process

to ensure crystallization grade.

• State-of-the-art algorithm used for plasmid design (Gene synthesis).

	This protein is a made to order protein and will be made for the first time for your order. Our	
	experts in the lab will ensure that you receive a correctly folded protein.	
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom	
	made proteins from other companies is that there is no financial obligation in case the protein	
	cannot be expressed or purified.	
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything	
	(other companies might charge you for any performed steps in the expression process for	
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression	
	experiments or purification optimization).	
	When you order this made-to-order protein you will only pay upon receival of the correctly	
	folded protein. With no financial risk on your end you can rest assured that our experienced	
	protein experts will do everything to make sure that you receive the protein you ordered.	
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.	
	The protein's absorbance will be measured in several dilutions and is measured against its	
	specific reference buffer.	
	The concentration of the protein is calculated using its specific absorption coefficient. We use	
	the Expasy's protparam tool to determine the absorption coefficient of each protein.	
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:	
	1. In a first purification step, the protein is purified from the cleared cell lysate using three	
	different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate	
	fractions are analyzed by SDS-PAGE. 2. Protein containing fractions of the best purification are subjected to second purification step	
	through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and	
	Western blot.	
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.	
Sterility:	0.22 µm filtered	
Endotoxin Level:	Protein is endotoxin free.	
Grade:	Crystallography grade	
Target Details		
Target:	MERTK	
Alternative Name:	MERTK (MERTK Products)

## Target Details

Background:	Receptor tyrosine kinase that transduces signals from the extracellular matrix into the	
	cytoplasm by binding to several ligands including LGALS3, TUB, TULP1 or GAS6. Regulates	
	many physiological processes including cell survival, migration, differentiation, and	
	phagocytosis of apoptotic cells (efferocytosis). Ligand binding at the cell surface induces	
	autophosphorylation of MERTK on its intracellular domain that provides docking sites for	
	downstream signaling molecules. Following activation by ligand, interacts with GRB2 or PLCG2	
	and induces phosphorylation of MAPK1, MAPK2, FAK/PTK2 or RAC1. MERTK signaling plays a	
	role in various processes such as macrophage clearance of apoptotic cells, platelet	
	aggregation, cytoskeleton reorganization and engulfment. Functions in the retinal pigment	
	epithelium (RPE) as a regulator of rod outer segments fragments phagocytosis. Plays also an	
	important role in inhibition of Toll-like receptors (TLRs)-mediated innate immune response by	
	activating STAT1, which selectively induces production of suppressors of cytokine signaling	
	SOCS1 and SOCS3. {ECO:0000269 PubMed:17005688}.	
Molecular Weight:	53.6 kDa Including tag.	
UniProt:	Q12866	
Pathways:	RTK Signaling	

## Application Details

Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only

## Handling

Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
