antibodies

Datasheet for ABIN3093863 MMP13 Protein (AA 104-471) (His tag)

Overview

Quantity:	1 mg
Target:	MMP13
Protein Characteristics:	AA 104-471
Origin:	Human
Source:	Escherichia coli (E. coli)
Protein Type:	Recombinant
Purification tag / Conjugate:	This MMP13 protein is labelled with His tag.
Application:	SDS-PAGE (SDS), Western Blotting (WB), ELISA, Crystallization (Crys)

Product Details

Sequence:	YNVFPRTLKW SKMNLTYRIV NYTPDMTHSE VEKAFKKAFK VWSDVTPLNF TRLHDGIADI
	MISFGIKEHG DFYPFDGPSG LLAHAFPPGP NYGGDAHFDD DETWTSSSKG YNLFLVAAHE
	FGHSLGLDHS KDPGALMFPI YTYTGKSHFM LPDDDVQGIQ SLYGPGDEDP NPKHPKTPDK
	CDPSLSLDAI TSLRGETMIF KDRFFWRLHP QQVDAELFLT KSFWPELPNR IDAAYEHPSH
	DLIFIFRGRK FWALNGYDIL EGYPKKISEL GLPKEVKKIS AAVHFEDTGK TLLFSGNQVW
	RYDDTNHIMD KDYPRLIEED FPGIGDKVDA VYEKNGYIYF FNGPIQFEYS IWSNRIVRVM
	PANSILWC
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	Made in Germany - from design to production - by highly experienced protein experts.
	Human MMP13 Protein (raised in E. Coli) purified by multi-step, protein-specific process to
	ensure crystallization grade.

	State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in bacterial culture:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three different Lie tog conture materials; high yield EDTA resistant or DTT resistant. Fluete
	different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE.
	2. Protein containing fractions of the best purification are subjected to second purification step
	through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and
	Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Endotoxin has not been removed. Please contact us if you require endotoxin removal.
Grade:	Crystallography grade
Target Details	
Target:	MMP13
Alternative Name:	MMP13 (MMP13 Products)

Target Details	
Background:	Plays a role in the degradation of extracellular matrix proteins including fibrillar collagen,
	fibronectin, TNC and ACAN. Cleaves triple helical collagens, including type I, type II and type III
	collagen, but has the highest activity with soluble type II collagen. Can also degrade collagen
	type IV, type XIV and type X. May also function by activating or degrading key regulatory
	proteins, such as TGFB1 and CTGF. Plays a role in wound healing, tissue remodeling, cartilage
	degradation, bone development, bone mineralization and ossification. Required for normal
	embryonic bone development and ossification. Plays a role in the healing of bone fractures via
	endochondral ossification. Plays a role in wound healing, probably by a mechanism that
	involves proteolytic activation of TGFB1 and degradation of CTGF. Plays a role in keratinocyte
	migration during wound healing. May play a role in cell migration and in tumor cell invasion.

Molecular Weight:	43.2 kDa Including tag.
UniProt:	P45452
Application Dataila	
Application Details	

Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	

Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
