Datasheet for ABIN3093963 MYOC Protein (AA 33-226) (His tag)

Image

Overview

Quantity:	1 mg
Target:	MYOC
Protein Characteristics:	AA 33-226
Origin:	Human
Source:	Escherichia coli (E. coli)
Protein Type:	Recombinant
Purification tag / Conjugate:	This MYOC protein is labelled with His tag.
Application:	Western Blotting (WB), ELISA, SDS-PAGE (SDS), Crystallization (Crys)
Product Details	
Sequence:	RTAQLRKAND QSGRCQYTFS VASPNESSCP EQSQAMSVIH NLQRDSSTQR LDLEATKARL
	SSLESLLHQL TLDQAARPQE TQEGLQRELG TLRRERDQLE TQTRELETAY SNLLRDKSVL
	EEEKKRLRQE NENLARRLES SSQEVARLRR GQCPQTRDTA RAVPPGSREV STWNLDTLAF
	QELKSELTEV PASR
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	 Made in Germany - from design to production - by highly experienced protein experts. Human MYOC Protein (raised in E. Coli) purified by multi-step, protein-specific process to ensure crystallization grade. State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a made to order protein and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein.

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 1/4 | Product datasheet for ABIN3093963 | 09/11/2023 | Copyright antibodies-online. 	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in bacterial culture:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three
	different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
	fractions are analyzed by SDS-PAGE.
	2. Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and
	Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Endotoxin has not been removed. Please contact us if you require endotoxin removal.
Grade:	Crystallography grade
Target Details	
<u> </u>	
Target:	MYOC

l'arget:	MYUC
Alternative Name:	MYOC (MYOC Products)
Background:	Secreted glycoprotein regulating the activation of different signaling pathways in adjacent cells
	to control different processes including cell adhesion, cell-matrix adhesion, cytoskeleton
	organization and cell migration. Promotes substrate adhesion, spreading and formation of focal

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 2/4 | Product datasheet for ABIN3093963 | 09/11/2023 | Copyright antibodies-online. 	contacts. Negatively regulates cell-matrix adhesion and stress fiber assembly through Rho
	protein signal transduction. Modulates the organization of actin cytoskeleton by stimulating the
	formation of stress fibers through interactions with components of Wnt signaling pathways.
	Promotes cell migration through activation of PTK2 and the downstream phosphatidylinositol
	3-kinase signaling. Plays a role in bone formation and promotes osteoblast differentiation in a
	dose-dependent manner through mitogen-activated protein kinase signaling. Mediates
	myelination in the peripheral nervous system through ERBB2/ERBB3 signaling. Plays a role as a
	regulator of muscle hypertrophy through the components of dystrophin-associated protein
	complex. Involved in positive regulation of mitochondrial depolarization. Plays a role in neurite
	outgrowth. May participate in the obstruction of fluid outflow in the trabecular meshwork.
	{ECO:0000250 UniProtKB:070624, ECO:0000269 PubMed:17516541,

	EC0:0000269 PubMed:23897819}.
Molecular Weight:	23.1 kDa Including tag.
UniProt:	Q99972
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee
	though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be
	insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to
	increase solubility. We will discuss all possible options with you in detail to assure that you
	receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid

100 mM NaCL, 20 mM Hepes, 10% gl	cerol. pH value is at the discretion of the manufacturer.
----------------------------------	---

Handling Advice: Avoid repeated freeze-thaw cycles.

Buffer:
