Datasheet for ABIN3094058 NDFIP1 Protein (AA 2-116) (His tag)

Image

Overview

0.011011	
Quantity:	1 mg
Target:	NDFIP1
Protein Characteristics:	AA 2-116
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This NDFIP1 protein is labelled with His tag.
Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS), Crystallization (Crys)
Product Details	
Sequence:	ALALAALAAV EPACGSRYQQ LQNEEESGEP EQAAGDAPPP YSSISAESAA YFDYKDESGF
	PKPPSYNVAT TLPSYDEAER TKAEATIPLV PGRDEDFVGR DDFDDADQLR IGNDG
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	 Made in Germany - from design to production - by highly experienced protein experts. Human NDFIP1 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade. State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made to order protein and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 1/4 | Product datasheet for ABIN3094058 | 09/11/2023 | Copyright antibodies-online. Product Details	
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three
	different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE.
	2. Protein containing fractions of the best purification are subjected to second purification step
	through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and
	Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade

Target Details

Target:	NDFIP1
Alternative Name:	NDFIP1 (NDFIP1 Products)
Background:	Activates HECT domain-containing E3 ubiquitin-protein ligases, including NEDD4 and ITCH, and
	consequently modulates the stability of their targets. As a result, controls many cellular
	processes. Prevents chronic T-helper cells-mediated inflammation by activating ITCH and thus
	controlling JUNB degradation (By similarity). In cortical neurons, mediates the ubiquitination of
	SLC11A2/DMT1 by NEDD4L, leading to down-regulation of the divalent metal transporter and

Target Details

	protection of the cells from cobalt and iron toxicity (PubMed:19706893). Modulates EGFR
	signaling through multiple pathways. In particular, may regulate the ratio of AKT1-to-MAPK8
	signaling in response to EGF, acting on AKT1 probably through PTEN destabilization and on
	MAPK8 through ITCH-dependent MAP2K4 inactivation. As a result, may control cell growth rate
	(PubMed:20534535). Enhances the ubiquitination of BRAT1 mediated by E3 ubiquitin-protein
	ligases: NEDD4, NEDD4L and ITCH, and is required for the nuclear localization of ubiquitinated
	BRAT1 (PubMed:25631046). {ECO:0000250 UniProtKB:Q8R0W6,
	ECO:0000269 PubMed:19343052, ECO:0000269 PubMed:19706893,
	ECO:0000269 PubMed:20534535, ECO:0000269 PubMed:25631046}.
Molecular Weight:	13.2 kDa Including tag.
UniProt:	Q9BT67
Pathways:	Transition Metal Ion Homeostasis, Regulation of Leukocyte Mediated Immunity, Production of
	Molecular Mediator of Immune Response, Negative Regulation of Transporter Activity

Application Details

Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only

Handling

Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
