## Datasheet for ABIN3094101 MME Protein (AA 52-750) (His tag)

Image

#### Overview

Quantity:	1 mg
Target:	MME
Protein Characteristics:	AA 52-750
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This MME protein is labelled with His tag.
Application:	SDS-PAGE (SDS), Western Blotting (WB), ELISA, Crystallization (Crys)

#### Product Details

Sequence:	YDDGICKSSD CIKSAARLIQ NMDATTEPCT DFFKYACGGW LKRNVIPETS SRYGNFDILR
	DELEVVLKDV LQEPKTEDIV AVQKAKALYR SCINESAIDS RGGEPLLKLL PDIYGWPVAT

	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	<ul> <li>Made in Germany - from design to production - by highly experienced protein experts.</li> <li>Human MME Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade.</li> <li>State-of-the-art algorithm used for plasmid design (Gene synthesis).</li> </ul>
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	<ol> <li>In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE.</li> <li>Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and</li> </ol>
	Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade

#### Target Details

Target:	MME
Alternative Name:	MME (MME Products)
Target Type:	Chemical
Background:	Thermolysin-like specificity, but is almost confined on acting on polypeptides of up to 30 amino
	acids (PubMed:15283675, PubMed:8168535). Biologically important in the destruction of opioid
	peptides such as Met- and Leu-enkephalins by cleavage of a Gly-Phe bond
	(PubMed:17101991). Able to cleave angiotensin-1, angiotensin-2 and angiotensin 1-9
	(PubMed:15283675). Involved in the degradation of atrial natriuretic factor (ANF)
	(PubMed:2531377, PubMed:2972276). Displays UV-inducible elastase activity toward skin
	preelastic and elastic fibers (PubMed:20876573). {ECO:0000269 PubMed:15283675,
	ECO:0000269 PubMed:17101991, ECO:0000269 PubMed:20876573,
	ECO:0000269 PubMed:2531377, ECO:0000269 PubMed:2972276}.
Molecular Weight:	80.8 kDa Including tag.
UniProt:	P08473
Pathways:	RTK Signaling, Peptide Hormone Metabolism, Regulation of Systemic Arterial Blood Pressure
	by Hormones, Smooth Muscle Cell Migration

### Application Details

Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.

#### Handling

Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
