

Datasheet for ABIN3094317 PACSIN2 Protein (AA 1-486) (Strep Tag)

Overview

Quantity:	250 µg
Target:	PACSIN2
Protein Characteristics:	AA 1-486
Origin:	Human
Source:	Cell-free protein synthesis (CFPS)
Protein Type:	Recombinant
Purification tag / Conjugate:	This PACSIN2 protein is labelled with Strep Tag.
Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS)

Product Details

Brand:	AliCE®
Sequence:	MSVTYDDSVG VEVSSDSFWE VGNYKRTVKR IDDGHRLCSD LMNCLHERAR IEKAYAQQLT

	have a special request, please contact us.
Characteristics:	Key Benefits:
	 Made in Germany - from design to production - by highly experienced protein experts. Protein expressed with ALiCE® and purified in one-step affinity chromatography These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed). State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made-to-order protein and will be made for the first time for your order. Our
	experts in the lab try to ensure that you receive soluble protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.
	Expression System:
	 ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require post-translational modifications. During lysate production, the cell wall and other cellular components that are not required for protein production are removed, leaving only the protein production machinery and the mitochondria to drive the reaction. During our lysate completion steps, the additional components needed for protein production (amino acids, cofactors, etc.) are added to produce something that functions like a cell, but without the constraints of a living system - all that's needed is the DNA that codes for the desired protein!
	Concentration:
	 The concentration of our recombinant proteins is measured using the absorbance at 280nm The protein's absorbance will be measured against its specific reference buffer. We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.
Purification:	One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®).
Purity:	> 70-80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC).
Grade:	custom-made

Target Details

~	
Target:	PACSIN2
Alternative Name:	PACSIN2 (PACSIN2 Products)
Background:	Protein kinase C and casein kinase substrate in neurons protein 2 (Syndapin-2) (Syndapin-II)
	(SdpII),FUNCTION: Regulates the morphogenesis and endocytosis of caveolae (By similarity).
	Lipid-binding protein that is able to promote the tubulation of the phosphatidic acid-containing
	membranes it preferentially binds. Plays a role in intracellular vesicle-mediated transport.
	Involved in the endocytosis of cell-surface receptors like the EGF receptor, contributing to its
	internalization in the absence of EGF stimulus. {ECO:0000250 UniProtKB:Q9WVE8,
	EC0:0000269 PubMed:21693584, EC0:0000269 PubMed:23129763,
	ECO:0000269 PubMed:23236520, ECO:0000269 PubMed:23596323}., FUNCTION: (Microbial
	infection) Specifically enhances the efficiency of HIV-1 virion spread by cell-to-cell transfer
	(PubMed:29891700). Also promotes the protrusion engulfment during cell-to-cell spread of
	bacterial pathogens like Listeria monocytogenes (PubMed:31242077). Involved in lipid drople
	formation, which is important for HCV virion assembly (PubMed:31801866).
	{ECO:0000269 PubMed:29891700, ECO:0000269 PubMed:31242077,
	ECO:0000269 PubMed:31801866}.
Molecular Weight:	55.7 kDa
UniProt:	Q9UNF0
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studie
	as well. As the protein has not been tested for functional studies yet we cannot offer a
	guarantee though.
Comment:	ALiCE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from
	Nicotiana tabacum c.v This contains all the protein expression machinery needed to produce
	even the most difficult-to-express proteins, including those that require post-translational
	modifications.
	During lysate production, the cell wall and other cellular components that are not required for
	protein production are removed, leaving only the protein production machinery and the
	mitochondria to drive the reaction. During our lysate completion steps, the additional
	components needed for protein production (amino acids, cofactors, etc.) are added to produc

something that functions like a cell, but without the constraints of a living system - all that's needed is the DNA that codes for the desired protein!

Application Details

Restrictions:

For Research Use only

Handling

Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer. Standard Storage Buffer: PBS pH 7.4, 10 % Glycerol Might differ depending on protein.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	12 months
