# Datasheet for ABIN3094327 PA2G4 Protein (AA 2-394) (His tag)

Image

#### Overview

Quantity:	1 mg
Target:	PA2G4
Protein Characteristics:	AA 2-394
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This PA2G4 protein is labelled with His tag.
Application:	SDS-PAGE (SDS), Western Blotting (WB), ELISA, Crystallization (Crys)

	State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three
	different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
	fractions are analyzed by SDS-PAGE. 2. Protein containing fractions of the best purification are subjected to second purification step
	through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and
	Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade

# Target Details

Background:	May play a role in a ERBB3-regulated signal transduction pathway. Seems be involved in growth
	regulation. Acts a corepressor of the androgen receptor (AR) and is regulated by the ERBB3
	ligand neuregulin-1/heregulin (HRG). Inhibits transcription of some E2F1-regulated promoters,
	probably by recruiting histone acetylase (HAT) activity. Binds RNA. Associates with 28S, 18S
	and 5.8S mature rRNAs, several rRNA precursors and probably U3 small nucleolar RNA. May be
	involved in regulation of intermediate and late steps of rRNA processing. May be involved in
	ribosome assembly. Mediates cap-independent translation of specific viral IRESs (internal
	ribosomal entry site) (By similarity). Regulates cell proliferation, differentiation, and survival.
	Isoform 1 suppresses apoptosis whereas isoform 2 promotes cell differentiation (By similarity).

Pathways:	Myometrial Relaxation and Contraction, Regulation of Carbohydrate Metabolic Process,
	Hepatitis C, Toll-Like Receptors Cascades

# Application Details

Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
