## Datasheet for ABIN3094690 PLD6 Protein (AA 28-252) (His tag)

l Image

#### Overview

| Quantity:                     | 1 mg   |
|-------------------------------|--|
| Target:                       | PLD6   |
| Protein Characteristics:      | AA 28-252  |
| Origin:                       | Human  |
| Source:                       | Insect Cells   |
| Protein Type:                 | Recombinant  |
| Purification tag / Conjugate: | This PLD6 protein is labelled with His tag.                          |
| Application:                  | ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS) |
| Product Details               |  |
| Sequence:                     | RWLRSRRRP RREALFFPSQ VTCTEALLRA PGAELAELPE GCPCGLPHGE SALSRLLRAL     |
|                               | LAARASLDLC LFAFSSPQLG RAVQLLHQRG VRVRVVTDCD YMALNGSQIG LLRKAGIQVR    |
|                               | HDQDPGYMHH KFAIVDKRVL ITGSLNWTTQ AIQNNRENVL ITEDDEYVRL FLEEFERIWE    |

QFNPTKYTFF PPKKSHGSCA PPVSRAGGRL LSWHRTCGTS SESQT

Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a special request, please contact us.

Characteristics:

• Made in Germany - from design to production - by highly experienced protein experts.

- Human PLD6 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade.
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a made to order protein and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein.

Background:

|                   | The big advantage of ordering our made-to-order proteins in comparison to ordering custom  |
|-------------------|--|
|                   | made proteins from other companies is that there is no financial obligation in case the protein  |
|                   | cannot be expressed or purified.   |
|                   | In the unlikely event that the protein cannot be expressed or purified we do not charge anything   |
|                   | (other companies might charge you for any performed steps in the expression process for  |
|                   | custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression   |
|                   | experiments or purification optimization).   |
|                   | When you order this made-to-order protein you will only pay upon receival of the correctly   |
|                   | folded protein. With no financial risk on your end you can rest assured that our experienced   |
|                   | protein experts will do everything to make sure that you receive the protein you ordered.  |
|                   | The concentration of our recombinant proteins is measured using the absorbance at 280nm.   |
|                   | The protein's absorbance will be measured in several dilutions and is measured against its   |
|                   | specific reference buffer.   |
|                   | The concentration of the protein is calculated using its specific absorption coefficient. We use   |
|                   | the Expasy's protparam tool to determine the absorption coefficient of each protein.   |
| Purification:     | Two step purification of proteins expressed in baculovirus infected SF9 insect cells:  |
|                   | <ol> <li>In a first purification step, the protein is purified from the cleared cell lysate using three<br/>different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate<br/>fractions are analyzed by SDS-PAGE.</li> </ol> |
|                   | <ol> <li>Protein containing fractions of the best purification are subjected to second purification step<br/>through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and<br/>Western blot.</li> </ol>                           |
| Purity:           | >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.   |
| Sterility:        | 0.22 μm filtered   |
| Endotoxin Level:  | Protein is endotoxin free.   |
| Grade:            | Crystallography grade  |
| Target Details    |  |
| Target:           | PLD6   |
| Alternative Name: | PLD6 (PLD6 Products)   |
|                   |  |

Endonuclease that plays a critical role in PIWI-interacting RNA (piRNA) biogenesis during spermatogenesis. piRNAs provide essential protection against the activity of mobile genetic elements (By similarity). piRNA-mediated transposon silencing is thus critical for maintaining

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 2/4 | Product datasheet for ABIN3094690 | 09/11/2023 | Copyright antibodies-online. |                     | genome stability, in particular in germline cells when transposons are mobilized as a              |
|---------------------|--|
|                     | consequence of wide-spread genomic demethylation (By similarity). Has been proposed to act         |
|                     | as a cardiolipin hydrolase to generate phosphatidic acid at mitochondrial surface (By similarity). |
|                     | Although it cannot be excluded that it can act as a phospholipase in some circumstances, it        |
|                     | should be noted that cardiolipin hydrolase activity is either undetectable in vitro, or very low   |
|                     | (PubMed:21397848). In addition, cardiolipin is almost exclusively found on the inner               |
|                     | mitochondrial membrane, while PLD6 localizes to the outer mitochondrial membrane, facing           |
|                     | the cytosol (PubMed:21397848). Has been shown to be a backbone-non-specific, single strand-        |
|                     | specific nuclease, cleaving either RNA or DNA substrates with similar affinity. Produces 5'        |
|                     | phosphate and 3' hydroxyl termini, suggesting it could directly participate in the processing of   |
|                     | primary piRNA transcripts (By similarity). Also acts as a regulator of mitochondrial shape         |
|                     | through facilitating mitochondrial fusion (PubMed:17028579, PubMed:26711011).                      |
|                     | {ECO:0000250 UniProtKB:Q5SWZ9, ECO:0000269 PubMed:17028579,  |
|                     | ECO:0000269 PubMed:21397848, ECO:0000269 PubMed:26711011}.   |
| Molecular Weight:   | 26.4 kDa Including tag.  |
| UniProt:            | Q8N2A8   |
| Pathways:           | Ribonucleoprotein Complex Subunit Organization   |
| Application Details |  |
| Application Notes:  | In addition to the applications listed above we expect the protein to work for functional studies  |
|                     | as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee  |
|                     | though.  |
| Comment:            | In cases in which it is highly likely that the recombinant protein with the default tag will be    |
|                     | insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to      |
|                     | increase solubility. We will discuss all possible options with you in detail to assure that you    |
|                     | receive your protein of interest.  |
|                     |  |

# Handling

| Format:          | Liquid   |
|------------------|--|
| Buffer:          | 100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer. |
| Handling Advice: | Avoid repeated freeze-thaw cycles.   |

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 3/4 | Product datasheet for ABIN3094690 | 09/11/2023 | Copyright antibodies-online. ### Handling

| Storage:         | -80 °C                         |
|------------------|--------------------------------|
| Storage Comment: | Store at -80°C.                |
| Expiry Date:     | Unlimited (if stored properly) |
