## Datasheet for ABIN3094739 BVES Protein (AA 114-360) (His tag)

Overview

| 000000000000000000000000000000000000000 |   |
|---|---|
| Quantity:                               | 1 mg  |
| Target:                                 | BVES  |
| Protein Characteristics:                | AA 114-360  |
| Origin:                                 | Human   |
| Source:                                 | Insect Cells  |
| Protein Type:                           | Recombinant   |
| Purification tag / Conjugate:           | This BVES protein is labelled with His tag.   |
| Application:                            | ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS)  |
| Product Details                         |   |
| Sequence:                               | KKRPVKIEKE LSGMYRRLFE PLRVPPDLFR RLTGQFCMIQ TLKKGQTYAA EDKTSVDDRL   |
|   | SILLKGKMKV SYRGHFLHNI YPCAFIDSPE FRSTQMHKGE KFQVTIIADD NCRFLCWSRE   |
|   | RLTYFLESEP FLYEIFRYLI GKDITNKLYS LNDPTLNDKK AKKLEHQLSL CTQISMLEMR   |
|   | NSIASSSDSD DGLHQFLRGT SSMSSLHVSS PHQRASAKMK PIEEGAEDDD DVFEPASPNT   |
|   | LKVHQLP   |
|   | Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a  |
|   | special request, please contact us.   |
| Characteristics:                        | Made in Germany - from design to production - by highly experienced protein experts.  |
|   | <ul> <li>Human BVES Protein (raised in Insect Cells) purified by multi-step, protein-specific process to<br/>ensure crystallization grade.</li> </ul> |
|   | State-of-the-art algorithm used for plasmid design (Gene synthesis).  |
|   | This protein is a made to order protein and will be made for the first time for your order. Our   |
|   |   |

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 1/4 | Product datasheet for ABIN3094739 | 09/11/2023 | Copyright antibodies-online. |                  | experts in the lab will ensure that you receive a correctly folded protein.  |
|------------------|--|
|                  | The big advantage of ordering our made-to-order proteins in comparison to ordering custom  |
|                  | made proteins from other companies is that there is no financial obligation in case the protein  |
|                  | cannot be expressed or purified.   |
|                  | In the unlikely event that the protein cannot be expressed or purified we do not charge anything   |
|                  | (other companies might charge you for any performed steps in the expression process for  |
|                  | custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression   |
|                  | experiments or purification optimization).   |
|                  | When you order this made-to-order protein you will only pay upon receival of the correctly   |
|                  | folded protein. With no financial risk on your end you can rest assured that our experienced   |
|                  | protein experts will do everything to make sure that you receive the protein you ordered.  |
|                  | The concentration of our recombinant proteins is measured using the absorbance at 280nm.   |
|                  | The protein's absorbance will be measured in several dilutions and is measured against its   |
|                  | specific reference buffer.   |
|                  | The concentration of the protein is calculated using its specific absorption coefficient. We use   |
|                  | the Expasy's protparam tool to determine the absorption coefficient of each protein.   |
| Purification:    | Two step purification of proteins expressed in baculovirus infected SF9 insect cells:  |
|                  | <ol> <li>In a first purification step, the protein is purified from the cleared cell lysate using three<br/>different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate<br/>fractions are analyzed by SDS-PAGE.</li> </ol> |
|                  | 2. Protein containing fractions of the best purification are subjected to second purification step<br>through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and<br>Western blot.  |
| Purity:          | >95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.   |
| Sterility:       | 0.22 µm filtered   |
| Endotoxin Level: | Protein is endotoxin free.   |
| Grade:           | Crystallography grade  |
|                  |  |

## Target Details

| Target:           | BVES  |
|-------------------|---|
| Alternative Name: | BVES (BVES Products)  |
| Background:       | Cell adhesion molecule involved in the establishment and/or maintenance of cell integrity.    |
|                   | Involved in the formation and regulation of the tight junction (TJ) paracellular permeability |

|                     | barrier in epithelial cells (PubMed:16188940). Plays a role in VAMP3-mediated vesicular           |
|---------------------|---|
|                     | transport and recycling of different receptor molecules through its interaction with VAMP3.       |
|                     | Plays a role in the regulation of cell shape and movement by modulating the Rho-family GTPase     |
|                     | activity through its interaction with ARHGEF25/GEFT. Induces primordial adhesive contact and      |
|                     | aggregation of epithelial cells in a Ca(2+)-independent manner (By similarity). Involved in       |
|                     | skeletal muscle and heart development (PubMed:26642364). Also involved in striated muscle         |
|                     | regeneration and repair and in the regulation of cell spreading (By similarity).                  |
|                     | {ECO:0000250 UniProtKB:Q5PQZ7, ECO:0000250 UniProtKB:Q9ES83,                                      |
|                     | ECO:0000269 PubMed:16188940, ECO:0000269 PubMed:26642364}.  |
| Molecular Weight:   | 29.5 kDa Including tag.   |
| UniProt:            | Q8NE79  |
|                     |   |
| Application Details |   |
| Application Notes:  | In addition to the applications listed above we expect the protein to work for functional studies |
|                     | as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee |
|                     | though.   |

In cases in which it is highly likely that the recombinant protein with the default tag will be

insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to

increase solubility. We will discuss all possible options with you in detail to assure that you

| Handling |  |
|----------|--|

Restrictions:

Comment:

| Format:          | Liquid   |
|------------------|--|
| Buffer:          | 100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer. |
| Handling Advice: | Avoid repeated freeze-thaw cycles.   |
| Storage:         | -80 °C   |
| Storage Comment: | Store at -80°C.  |
| Expiry Date:     | Unlimited (if stored properly)   |

receive your protein of interest.
