Datasheet for ABIN3094941 RanBP3 Protein (AA 2-567) (His tag)

Image

Overview

Quantity:	1 mg
Target:	RanBP3 (RANBP3)
Protein Characteristics:	AA 2-567
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This RanBP3 protein is labelled with His tag.
Application:	ELISA, Western Blotting (WB), SDS-PAGE (SDS), Crystallization (Crys)

Product Details

Sequence:	ADLANEEKPA IAPPVFVFQK DKGQKSPAEQ KNLSDSGEEP RGEAEAPHHG TGHPESAGEH

Product Details	
Characteristics:	 Made in Germany - from design to production - by highly experienced protein experts. Human RANBP3 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade. State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	 In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE. Protein containing fractions of the best purification are subjected to second purification step
	through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade

Target Details	
Target:	RanBP3 (RANBP3)
Alternative Name:	RANBP3 (RANBP3 Products)
Background:	Acts as a cofactor for XPO1/CRM1-mediated nuclear export, perhaps as export complex
	scaffolding protein. Bound to XPO1/CRM1, stabilizes the XPO1/CRM1-cargo interaction. In the
	absence of Ran-bound GTP prevents binding of XPO1/CRM1 to the nuclear pore complex.
	Binds to CHC1/RCC1 and increases the guanine nucleotide exchange activity of CHC1/RCC1.
	Recruits XP01/CRM1 to CHC1/RCC1 in a Ran-dependent manner. Negative regulator of TGF-
	beta signaling through interaction with the R-SMAD proteins, SMAD2 and SMAD3, and
	mediating their nuclear export. {ECO:0000269 PubMed:11425870,
	ECO:0000269 PubMed:11571268, ECO:0000269 PubMed:11932251,
	ECO:0000269 PubMed:19289081, ECO:0000269 PubMed:9637251}.
Molecular Weight:	61.0 kDa Including tag.
UniProt:	Q9H6Z4
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be
	insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to
	increase solubility. We will discuss all possible options with you in detail to assure that you
	receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
