# Datasheet for ABIN3095483 KNSTRN Protein (AA 1-316) (Strep Tag)

### Overview

Quantity:	1 mg
Target:	KNSTRN
Protein Characteristics:	AA 1-316
Origin:	Human
Source:	Tobacco (Nicotiana tabacum)
Protein Type:	Recombinant
Purification tag / Conjugate:	This KNSTRN protein is labelled with Strep Tag.
Application:	ELISA, SDS-PAGE (SDS), Western Blotting (WB)

### Product Details

Sequence:	MAAPEAPPLD RVFRTTWLST ECDSHPLPPS YRKFLFETQA ADLAGGTTVA AGNLLNESEK
	DCGQDRRAPG VQPCRLVTMT SVVKTVYSLQ PPSALSGGQP ADTQTRATSK SLLPVRSKEV
	DVSKQLHSGG PENDVTKITK LRRENGQMKA TDTATRRNVR KGYKPLSKQK SEEELKDKNQ
	LLEAVNKQLH QKLTETQGEL KDLTQKVELL EKFRDNCLAI LESKGLDPAL GSETLASRQE
	STTDHMDSML LLETLQEELK LFNETAKKQM EELQALKVKL EMKEERVRFL EQQTLCNNQV
	NDLTTALKEM EQLLEM
	Sequence without tag. The proposed Strep-Tag is based on experience s with the expression
	system, a different complexity of the protein could make another tag necessary. In case you
	have a special request, please contact us.
Characteristics:	Key Benefits:
	Made in Germany - from design to production - by highly experienced protein experts.
	Protein expressed with ALiCE® and purified by multi-step, protein-specific process to ensure

All rights reserved. correct folding and modification.

- These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab will ensure that you receive a correctly folded protein. The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

#### Expression System:

- ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require post-translational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
  protein production are removed, leaving only the protein production machinery and the
  mitochondria to drive the reaction. During our lysate completion steps, the additional
  components needed for protein production (amino acids, cofactors, etc.) are added to
  produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

#### Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer.
- We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.

Purification:	Two step purification of proteins expressed in Almost Living Cell-Free Expression System
	(ALICE®):
	<ol> <li>In a first purification step, the protein is purified from the cleared cell lysate using StrepTag capture material. Eluate fractions are analyzed by SDS-PAGE.</li> </ol>
	2. Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.
Purity:	>80 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.

Product Details	
Endotoxin Level:	Low Endotoxin less than 1 EU/mg (< 0.1 ng/mg)
Grade:	Crystallography grade
Target Details	
Target:	KNSTRN
Alternative Name:	KNSTRN (KNSTRN Products)
Background:	<ul> <li>Small kinetochore-associated protein (SKAP) (Kinetochore-localized astrin-binding protein)</li> <li>(Kinastrin) (Kinetochore-localized astrin/SPAG5-binding protein) (TRAF4-associated factor</li> <li>1),FUNCTION: Essential component of the mitotic spindle required for faithful chromosome segregation and progression into anaphase (PubMed:19667759). Promotes the metaphase-to-anaphase transition and is required for chromosome alignment, normal timing of sister</li> <li>chromatid segregation, and maintenance of spindle pole architecture (PubMed:19667759,</li> <li>PubMed:22110139). The astrin (SPAG5)-kinastrin (SKAP) complex promotes stable</li> <li>microtubule-kinetochore attachments (PubMed:21402792). Required for kinetochore</li> <li>oscillations and dynamics of microtubule plus-ends during live cell mitosis, possibly by forming</li> <li>a link between spindle microtubule plus-ends and mitotic chromosomes to achieve faithful cell</li> <li>division (PubMed:23035123). May be involved in UV-induced apoptosis via its interaction with</li> <li>PRPF19, however, these results need additional evidences (PubMed:24718257).</li> <li>{ECO:0000269 PubMed:19667759, ECO:0000269 PubMed:21402792,</li> <li>ECO:0000269 PubMed:22110139, ECO:0000269 PubMed:23035123,</li> <li>ECO:0000305 PubMed:24718257).</li> </ul>
Molecular Weight:	35.4 kDa
UniProt:	Q9Y448
Pathways:	M Phase
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.

	modifications.
	During lysate production, the cell wall and other cellular components that are not required for
	protein production are removed, leaving only the protein production machinery and the
	mitochondria to drive the reaction. During our lysate completion steps, the additional
	components needed for protein production (amino acids, cofactors, etc.) are added to produce
	something that functions like a cell, but without the constraints of a living system - all that's
	needed is the DNA that codes for the desired protein!
Restrictions:	For Research Use only

## Handling

Format:	Liquid
Buffer:	The buffer composition is at the discretion of the manufacturer. If you have a special request, please contact us.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
