antibodies

Datasheet for ABIN3095655 Stim2 Protein (AA 236-746) (His tag)

Image

Overview

Quantity:	1 mg
Target:	Stim2
Protein Characteristics:	AA 236-746
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This Stim2 protein is labelled with His tag.
Application:	Western Blotting (WB), Crystallization (Crys), ELISA, SDS-PAGE (SDS)

Product Details

Sequence:	TQNKTSKEHV AKMMKDLESL QTAEQSLMDL QERLEKAQEE NRNVAVEKQN LERKMMDEIN

Product Details	
Characteristics:	 Made in Germany - from design to production - by highly experienced protein experts. Human STIM2 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade. State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	 In a first purification step, the protein is purified from the cleared cell lysate using three different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate fractions are analyzed by SDS-PAGE.
	 Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade

Target Details

Target:	Stim2
Alternative Name:	STIM2 (Stim2 Products)
Background:	Plays a role in mediating store-operated Ca(2+) entry (SOCE), a Ca(2+) influx following depletior
	of intracellular Ca(2+) stores. Functions as a highly sensitive Ca(2+) sensor in the endoplasmic
	reticulum which activates both store-operated and store-independent Ca(2+)-influx. Regulates
	basal cytosolic and endoplasmic reticulum Ca(2+) concentrations. Upon mild variations of the
	endoplasmic reticulum Ca(2+) concentration, translocates from the endoplasmic reticulum to
	the plasma membrane where it probably activates the Ca($2+$) release-activated Ca($2+$) (CRAC)
	channels ORAI1, ORAI2 and ORAI3. May inhibit STIM1-mediated Ca(2+) influx.
	{ECO:0000269 PubMed:16005298, ECO:0000269 PubMed:16860747,
	ECO:0000269 PubMed:17905723, ECO:0000269 PubMed:18160041,

	EC0:0000269 PubMed:23359669}.
Molecular Weight:	58.3 kDa Including tag.
UniProt:	Q9P246
Pathways:	TCR Signaling, BCR Signaling
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee
	though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be
	insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to
	increase solubility. We will discuss all possible options with you in detail to assure that you

Restrictions: For Research Use only

Handling

Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.

receive your protein of interest.
