Datasheet for ABIN3096009 TREX1 Protein (AA 1-369) (His tag)

I Image

Overview

Quantity:	1 mg
Target:	TREX1
Protein Characteristics:	AA 1-369
Origin:	Human
Source:	Insect Cells
Protein Type:	Recombinant
Purification tag / Conjugate:	This TREX1 protein is labelled with His tag.
Application:	Western Blotting (WB), SDS-PAGE (SDS), ELISA, Crystallization (Crys)

Product Details

Sequence:	MGPGARRQGR IVQGRPEMCF CPPPTPLPPL RILTLGTHTP TPCSSPGSAA GTYPTMGSQA
	LPPGPMQTLI FFDMEATGLP FSQPKVTELC LLAVHRCALE SPPTSQGPPP TVPPPPRVVD
	KLSLCVAPGK ACSPAASEIT GLSTAVLAAH GRQCFDDNLA NLLLAFLRRQ PQPWCLVAHN
	GDRYDFPLLQ AELAMLGLTS ALDGAFCVDS ITALKALERA SSPSEHGPRK SYSLGSIYTR
	LYGQSPPDSH TAEGDVLALL SICQWRPQAL LRWVDAHARP FGTIRPMYGV TASARTKPRP
	SAVTTTAHLA TTRNTSPSLG ESRGTKDLPP VKDPGALSRE GLLAPLGLLA ILTLAVATLY
	GLSLATPGE
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	 Made in Germany - from design to production - by highly experienced protein experts. Human TREX1 Protein (raised in Insect Cells) purified by multi-step, protein-specific process to ensure crystallization grade.
	to choure orystallization grade.

	• State of the art algorithm used for plasmid design (Cons synthesis)
	State-of-the-art algorithm used for plasmid design (Gene synthesis).
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in baculovirus infected SF9 insect cells:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three
	different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
	fractions are analyzed by SDS-PAGE. 2. Protein containing fractions of the best purification are subjected to second purification step
	through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and
	Western blot.
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Protein is endotoxin free.
Grade:	Crystallography grade
Target Details	
Target:	TREX1
Alternative Name:	TREX1 (TREX1 Products)

Target Details

Background:	Major cellular 3'-to-5' DNA exonuclease which digests single-stranded DNA (ssDNA) and
	double-stranded DNA (dsDNA) with mismatched 3' termini. Prevents cell-intrinsic initiation of
	autoimmunity. Acts by metabolizing DNA fragments from endogenous retroelements, including
	L1, LTR and SINE elements. Unless degraded, these DNA fragments accumulate in the cytosol
	and activate the IFN-stimulatory DNA (ISD) response and innate immune signaling. Prevents
	chronic ATM-dependent checkpoint activation, by processing ssDNA polynucleotide species
	arising from the processing of aberrant DNA replication intermediates. Inefficiently degrades
	oxidized DNA, such as that generated upon antimicrobial reactive oxygen production or upon
	absorption of UV light. During GZMA-mediated cell death, contributes to DNA damage in
	concert with NME1. NME1 nicks one strand of DNA and TREX1 removes bases from the free 3'
	end to enhance DNA damage and prevent DNA end reannealing and rapid repair.

	ECO:0000269 PubMed:18045533, ECO:0000269 PubMed:23993650}.
Molecular Weight:	39.9 kDa Including tag.
UniProt:	Q9NSU2
Pathways:	Apoptosis

Application Details

Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to increase solubility. We will discuss all possible options with you in detail to assure that you receive your protein of interest.
Restrictions:	For Research Use only
Handling	
Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.

Handling

Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
