Datasheet for ABIN3096402 WDR61 Protein (AA 1-305) (His tag)

1 Image

Overview

0000000	
Quantity:	1 mg
Target:	WDR61
Protein Characteristics:	AA 1-305
Origin:	Human
Source:	Escherichia coli (E. coli)
Protein Type:	Recombinant
Purification tag / Conjugate:	This WDR61 protein is labelled with His tag.
Application:	ELISA, Western Blotting (WB), Crystallization (Crys), SDS-PAGE (SDS)
Product Details	
Sequence:	MTNQYGILFK QEQAHDDAIW SVAWGTNKKE NSETVVTGSL DDLVKVWKWR DERLDLQWSL
	EGHQLGVVSV DISHTLPIAA SSSLDAHIRL WDLENGKQIK SIDAGPVDAW TLAFSPDSQY
	LATGTHVGKV NIFGVESGKK EYSLDTRGKF ILSIAYSPDG KYLASGAIDG IINIFDIATG
	KLLHTLEGHA MPIRSLTFSP DSQLLVTASD DGYIKIYDVQ HANLAGTLSG HASWVLNVAF
	CPDDTHFVSS SSDKSVKVWD VGTRTCVHTF FDHQDQVWGV KYNGNGSKIV SVGDDQEIHI
	YDCPI
	Sequence without tag. Tag location is at the discretion of the manufacturer. If you have a
	special request, please contact us.
Characteristics:	 Made in Germany - from design to production - by highly experienced protein experts. Human WDR61 Protein (raised in E. Coli) purified by multi-step, protein-specific process to ensure crystallization grade. State-of-the-art algorithm used for plasmid design (Gene synthesis).

Product Details	
	This protein is a made to order protein and will be made for the first time for your order. Our
	experts in the lab will ensure that you receive a correctly folded protein.
	The big advantage of ordering our made-to-order proteins in comparison to ordering custom
	made proteins from other companies is that there is no financial obligation in case the protein
	cannot be expressed or purified.
	In the unlikely event that the protein cannot be expressed or purified we do not charge anything
	(other companies might charge you for any performed steps in the expression process for
	custom-made proteins, e.g. fees might apply for the expression plasmid, the first expression
	experiments or purification optimization).
	When you order this made-to-order protein you will only pay upon receival of the correctly
	folded protein. With no financial risk on your end you can rest assured that our experienced
	protein experts will do everything to make sure that you receive the protein you ordered.
	The concentration of our recombinant proteins is measured using the absorbance at 280nm.
	The protein's absorbance will be measured in several dilutions and is measured against its
	specific reference buffer.
	The concentration of the protein is calculated using its specific absorption coefficient. We use
	the Expasy's protparam tool to determine the absorption coefficient of each protein.
Purification:	Two step purification of proteins expressed in bacterial culture:
	1. In a first purification step, the protein is purified from the cleared cell lysate using three
	different His-tag capture materials: high yield, EDTA resistant, or DTT resistant. Eluate
	fractions are analyzed by SDS-PAGE.
	2. Protein containing fractions of the best purification are subjected to second purification step through size exclusion chromatography. Eluate fractions are analyzed by SDS-PAGE and
	Western blot.
D	
Purity:	>95 % as determined by SDS PAGE, Size Exclusion Chromatography and Western Blot.
Sterility:	0.22 µm filtered
Endotoxin Level:	Endotoxin has not been removed. Please contact us if you require endotoxin removal.
Grade:	Crystallography grade
Target Details	
<u> </u>	WDD61
Target:	WDR61
Alternative Name:	WDR61 (WDR61 Products)

Background: Component of the PAF1 complex (PAF1C) which has multiple functions during transcription by

Order at www.antibodies-online.com | www.antikoerper-online.de | www.anticorps-enligne.fr | www.antibodies-online.cn International: +49 (0)241 95 163 153 | USA & Canada: +1 877 302 8632 | support@antibodies-online.com Page 2/4 | Product datasheet for ABIN3096402 | 09/11/2023 | Copyright antibodies-online. 	RNA polymerase II and is implicated in regulation of development and maintenance of
	embryonic stem cell pluripotency. PAF1C associates with RNA polymerase II through
	interaction with POLR2A CTD non-phosphorylated and 'Ser-2'- and 'Ser-5'-phosphorylated forms
	and is involved in transcriptional elongation, acting both indepentently and synergistically with
	TCEA1 and in cooperation with the DSIF complex and HTATSF1. PAF1C is required for
	transcription of Hox and Wnt target genes. PAF1C is involved in hematopoiesis and stimulates
	transcriptional activity of KMT2A/MLL1, it promotes leukemogenesis through association with
	KMT2A/MLL1-rearranged oncoproteins, such as KMT2A/MLL1-MLLT3/AF9 and KMT2A/MLL1-
	MLLT1/ENL. PAF1C is involved in histone modifications such as ubiquitination of histone H2B
	and methylation on histone H3 'Lys-4' (H3K4me3). PAF1C recruits the RNF20/40 E3 ubiquitin-
	protein ligase complex and the E2 enzyme UBE2A or UBE2B to chromatin which mediate
	monoubiquitination of 'Lys-120' of histone H2B (H2BK120ub1), UB2A/B-mediated H2B
	ubiquitination is proposed to be coupled to transcription. PAF1C is involved in mRNA 3' end
	formation probably through association with cleavage and poly(A) factors. In case of infection
	by influenza A strain H3N2, PAF1C associates with viral NS1 protein, thereby regulating gene
	transcription. Required for mono- and trimethylation on histone H3 'Lys-4' (H3K4me3),
	dimethylation on histone H3 'Lys-79' (H3K4me3). Required for Hox gene transcription.
	Component of the SKI complex which is thought to be involved in exosome-mediated RNA
	decay and associates with transcriptionally active genes in a manner dependent on PAF1C.
	{EC0:0000269 PubMed:16024656, EC0:0000269 PubMed:16307923,
	ECO:0000269 PubMed:19952111, ECO:0000269 PubMed:20178742}.
Molecular Weight:	34.5 kDa Including tag.
UniProt:	Q9GZS3
Application Details	
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies
	as well. As the protein has not been tested for functional studies yet we cannot offer a gurantee
	though.
Comment:	In cases in which it is highly likely that the recombinant protein with the default tag will be
	insoluble our protein lab may suggest a higher molecular weight tag (e.g. GST-tag) instead to
	increase solubility. We will discuss all possible options with you in detail to assure that you
	receive your protein of interest.
Restrictions:	For Research Lise only

Handling

Format:	Liquid
Buffer:	100 mM NaCL, 20 mM Hepes, 10% glycerol. pH value is at the discretion of the manufacturer.
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	Unlimited (if stored properly)
