

## Datasheet for ABIN3096408 WWOX Protein (AA 1-414) (Strep Tag)

Overview

Quantity:	250 µg
Target:	WWOX
Protein Characteristics:	AA 1-414
Origin:	Human
Source:	Cell-free protein synthesis (CFPS)
Protein Type:	Recombinant
Purification tag / Conjugate:	This WWOX protein is labelled with Strep Tag.
Application:	SDS-PAGE (SDS), ELISA, Western Blotting (WB)

## Product Details

Brand:	AliCE®
Sequence:	MAALRYAGLD DTDSEDELPP GWEERTTKDG WVYYANHTEE KTQWEHPKTG KRKRVAGDLP
	YGWEQETDEN GQVFFVDHIN KRTTYLDPRL AFTVDDNPTK PTTRQRYDGS TTAMEILQGR
	DFTGKVVVVT GANSGIGFET AKSFALHGAH VILACRNMAR ASEAVSRILE EWHKAKVEAM
	TLDLALLRSV QHFAEAFKAK NVPLHVLVCN AATFALPWSL TKDGLETTFQ VNHLGHFYLV
	QLLQDVLCRS APARVIVVSS ESHRFTDIND SLGKLDFSRL SPTKNDYWAM LAYNRSKLCN
	ILFSNELHRR LSPRGVTSNA VHPGNMMYSN IHRSWWVYTL LFTLARPFTK SMQQGAATTV
	YCAAVPELEG LGGMYFNNCC RCMPSPEAQS EETARTLWAL SERLIQERLG SQSG
	Sequence without tag. The proposed Strep-Tag is based on experience s with the expression
	system, a different complexity of the protein could make another tag necessary. In case you
	have a special request, please contact us.
Characteristics:	Key Benefits:

- Made in Germany from design to production by highly experienced protein experts.
- · Protein expressed with ALiCE® and purified in one-step affinity chromatography
- These proteins are normally active (enzymatically functional) as our customers have reported (not tested by us and not guaranteed).
- State-of-the-art algorithm used for plasmid design (Gene synthesis).

This protein is a **made-to-order protein** and will be made for the first time for your order. Our experts in the lab try to ensure that you receive soluble protein.

The big advantage of ordering our **made-to-order proteins** in comparison to ordering custom made proteins from other companies is that there is no financial obligation in case the protein cannot be expressed or purified.

## Expression System:

- ALICE®, our Almost Living Cell-Free Expression System is based on a lysate obtained from Nicotiana tabacum c.v.. This contains all the protein expression machinery needed to produce even the most difficult-to-express proteins, including those that require posttranslational modifications.
- During lysate production, the cell wall and other cellular components that are not required for
  protein production are removed, leaving only the protein production machinery and the
  mitochondria to drive the reaction. During our lysate completion steps, the additional
  components needed for protein production (amino acids, cofactors, etc.) are added to
  produce something that functions like a cell, but without the constraints of a living system all that's needed is the DNA that codes for the desired protein!

## Concentration:

- The concentration of our recombinant proteins is measured using the absorbance at 280nm.
- The protein's absorbance will be measured against its specific reference buffer.
- We use the Expasy's ProtParam tool to determine the absorption coefficient of each protein.

Purification:	One-step Strep-tag purification of proteins expressed in Almost Living Cell-Free Expression System (AliCE®).
Purity:	> 70-80 % as determined by SDS PAGE, Western Blot and analytical SEC (HPLC).
Grade:	custom-made
Target Details	
Target:	WWOX

Target Details		
Alternative Name:	WWOX (WWOX Products)	
Background:	<ul> <li>WW domain-containing oxidoreductase (EC 1.1.1) (Fragile site FRA16D oxidoreductase) (Shor chain dehydrogenase/reductase family 41C member 1),FUNCTION: Putative oxidoreductase.</li> <li>Acts as a tumor suppressor and plays a role in apoptosis. Required for normal bone development (By similarity). May function synergistically with p53/TP53 to control genotoxic stress-induced cell death. Plays a role in TGFB1 signaling and TGFB1-mediated cell death. May also play a role in tumor necrosis factor (TNF)-mediated cell death. Inhibits Wnt signaling, probably by sequestering DVL2 in the cytoplasm. {EC0:0000269 PubMed:11719429, EC0:0000269 PubMed:15070730, EC0:0000269 PubMed:15548692, EC0:0000269 PubMed:16061658, EC0:0000269 PubMed:16219768, EC0:0000269 PubMed:19366691, EC0:0000269 PubMed:19465938}.</li> </ul>	
Molecular Weight:	46.7 kDa	
UniProt:	Q9NZC7	
Application Details		
Application Notes:	In addition to the applications listed above we expect the protein to work for functional studies as well. As the protein has not been tested for functional studies yet we cannot offer a guarantee though.	
Comment:

Buffer:	The buffer composition is at the discretion of the manufacturer. Standard Storage Buffer: PBS pH 7.4, 10 % Glycerol <b>Might differ depending on protein.</b>
Handling Advice:	Avoid repeated freeze-thaw cycles.
Storage:	-80 °C
Storage Comment:	Store at -80°C.
Expiry Date:	12 months
